

Technically speaking

Easy to install

The Cara Insert Stove can be easily fitted into a standard fireplace (16" x 22") in a few simple steps. Firstly remove the fireback and any loose materials. Next, insert the external convection casing into the opening, followed by the stove. Finally, connect to a standard chimney (125mm diameter) using either a flexi flue liner approved for solid fuel or a clay pot adapter.

Waterford Stanley want you to enjoy the maximum performance from your Cara Insert stove. To ensure this, it is essential that it is installed correctly. We recommend using a suitably qualified installer.

Easy to maintain

The Cara Insert Stove uses a lot less fuel so produces a lot less ash and less ash means less cleaning.

Better for the environment

The Stanley Cara Insert stove incorporates pre-heated secondary air. This maximises the stove's efficiency and leads to extremely low carbon monoxide emissions.

A lot more efficient

The Cara Insert Stove can significantly improve the efficiency of your fireplace. With a traditional open fire, you're effectively watching your money go up the chimney. With a Stanley stove, the vast majority of the heat generated stays in the room.

Stylish good looks

Like any Stanley product, the Cara Insert Stove looks good, its very presence can transform an otherwise ordinary room. Its traditional craftsmanship and contemporary design make it a centrepiece in any home.

- Cast Iron stove made to Stanley's high quality standard
- 4.9kW room heat
- Suitable for all types of solid fuel
- Air wash - air draught control enables a continuous view of the fire by keeping the glass clean
- Convection system for greater efficiency
- Large glass door

Our Cara Insert Stove fits into any existing standard fireplace opening*

*standard fireplace opening is 560mm h x 405mm w x 380 d

Stanley stoves are approved by the following

HETAS approval pending. HETAS is the official body recognised by Government to approve solid fuel domestic heating appliances, fuels and services.

Established in 1936, HETAS Ltd. is the official test and approval body for the domestic solid fuel industry. HETAS Ltd. approves and gives the three tick logo mark of quality assurance to solid fuel fires.

The external castings on Stanley solid fuel stoves are covered by warranty for up to 5 years. Ceramic glass is covered against thermal breakage for 3 years. Refractory materials, rope seals, glass seals, cement seals, the surface finish on seno models, grates and fire bars are covered under a standard 1 year warranty.*
*Terms and conditions apply.

A big idea for a small space

Cara Insert Stove

Quality you can trust

Steeped in tradition and heritage, Waterford Stanley has long been the hallmark of Irish quality. Our beautifully designed and superior built stoves and cookers have brought warmth and comfort to homes for generations. In a changing world, where space is limited and green credentials are everything, we're committed to bringing you the latest developments in efficient home heating. In moving with the times, we bring you the charm of old with the sophistication of new.

STANLEY™

Cleaner for you and greener... .. for the environment

Cara Insert Stove is the perfect solution for converting an inefficient open fire into a stylish, high performance fireplace. It's ideal for those who wish to retain their existing fireplace as it fits easily into a standard 16" opening with a standard chimney.

Front

Side

Top

The Cara Insert Stove can improve the energy rating of your house and boost the value of your home. Independent research has shown that stoves are three times more efficient than open fires. While anything up to 70% of heat from an

open fire goes straight up the chimney, the Cara Insert stove retains as much as 76% of the heat in the room, saving you fuel and money and as fuel is burned more efficiently it also benefits the environment.

Cara Insert stove - Main features

- Fits easily into a existing fireplace
- Easily connected to a standard 125mm diameter chimney
- Top flue outlet only
- 4.9kW output to room
- 76% efficient thanks to its convection system
- Modern, yet classic design
- High quality, cast iron build
- Suitable for all types of approved solid fuel
- Less fuel, means less ash so less cleaning
- Better for the environment thanks to clean burn technology
- Air wash system allows continuous flame view
