BOSCH

Invented for life

Who are Bosch?

"I have always acted according to the principle that it is better to lose money than trust. The integrity of my promises, the belief in the value of my products and in my word of honour have always had a higher priority to me than a transitory profit."

Robert Bosch, 1921

For over 125 years, the Bosch name has been synonymous with engineering excellence. Our home appliances are renowned for their quality, reliability and performance which derives from our inherent, unflagging commitment and the painstaking thoroughness with which every unit is made. As you would expect from German engineering, there are no gimmicks or frills with our products – just pure, clean lines and beautiful, functional simplicity that will enhance any kitchen.

For the fourth year running, **Bosch has received a prestigious Which? Award – Best Home Appliance Brand for 2014**. Our success is the fifth time in six years that we have received a coveted Which? Award that independently recognises Bosch's outstanding quality and customer experience. No other brand has won this accolade as many times and four years running is a record.

The values that shaped Robert Bosch's vision for his new company in 1886 are the same principles that guide the business today; never lose the trust of your customers, look after your staff and partners and change things for the better. It's what has kept Bosch at the forefront of the home appliance industry and what will keep it there in the future.

Bosch is a Superbrand – and that's official! Over 1,200 brands were independently scored for quality, reliability and distinctiveness and Bosch came 11th overall. The result not only puts Bosch on the prestigious Superbrands list for 2014, but also endorses the brand's reputation and provides additional reassurance when choosing Bosch.

Service you can depend on.

For help with your home appliance,
trust Bosch Customer Service.

Arrange an engineer visit.
Our appliances are manufactured to
the highest standards, but if you do
need a visit from an engineer we are
here to help. We have teams of locally
based engineers around the country
– employed and trained by Bosch*.
This gives them unrivalled expertise
and knowledge of our appliances.
We repair appliances both in and out
of guarantee. All repairs are analysed
in advance by a technical team so
that the parts likely to be needed
to complete the repair are sent to
the engineer's van the night before
the visit.

To arrange an engineer visit to
your home please call:
0344 892 8979
Lines are open 24 hours.

You can also arrange an engineer
visit online by visiting:
www.bosch-home.co.uk/bookonline

Product advice.
If you need help using programmes or
features, or need assistance selecting
a new Bosch appliance from our
current range, our product advice
team can help.

You can call us on
0344 892 8979 or visit:
www.bosch-home.co.uk
for frequently asked questions
and help videos.

Visit the Bosch online store.
Find a comprehensive selection of
accessories to help you get the most
out of your appliance, along with our
full range of replacement spare parts
and cleaning and care products at
the Bosch online store.

You can also purchase Tassimo hot
drinks machines, vacuum cleaners,
irons, steam stations, kettles,
toasters and food preparation
appliances directly from us online.

You can call us on
0344 892 8979 or visit:
www.bosch-home.co.uk/store

Calls will be answered 24 hours a day, seven days a week.
You can contact our specialist advisors Monday to Friday
8am to 8pm, Saturday 8am to 4pm and Sunday 9am to 3pm.
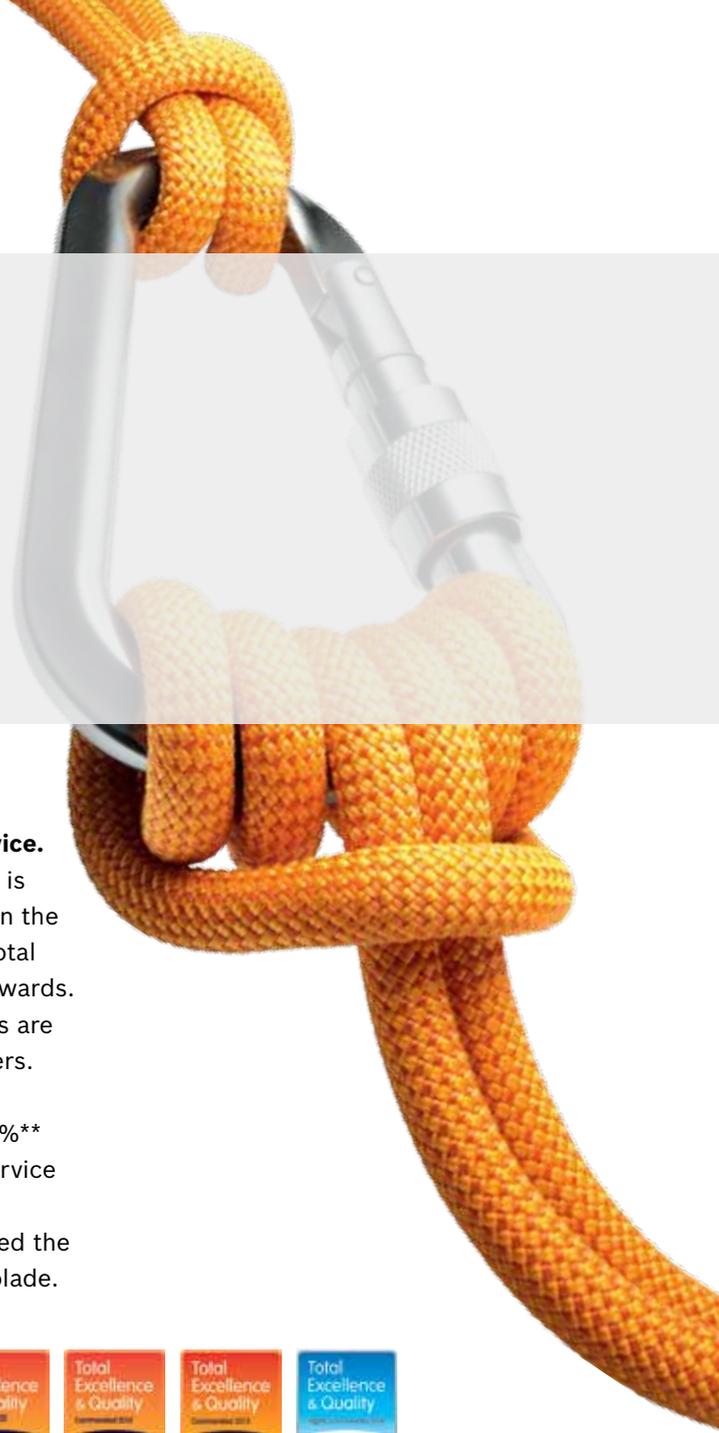

Accessories.
Many appliances can be enhanced with optional extras, such as telescopic rails for ovens or special cookware for hobs.

When buying a Bosch home appliance, you know you are purchasing a quality, reliable product. However many appliances are used daily, so need cleaning and maintaining to keep them looking great and operating at peak performance.

Every one of our cleaning and care products has been thoroughly tested and approved for safe and effective use on your Bosch home appliance.

Replacement spare parts.
We keep in stock a comprehensive range of replacement spare parts for our appliances for up to ten years. All our parts are original spare parts, not copies.

Highly commended service.
Bosch Customer Service is proud to be recognised in the Domestic and General Total Excellence and Quality awards. These prestigious awards are voted for by our customers.

In our latest results 94.6%** of customers said our service was excellent or good. This meant Bosch received the Highly Commended accolade.

*   In some remote areas we may use an approved service partner where the repair process may vary.
** Domestic and General Survey 2014.
    Calls are charged at the basic rate. Please check with your telephone service provider for exact charges.

Sustainably produced. Economical in use.

One of our guiding principles has been to design new technologies that save our customers time and effort, but also save energy and natural resources to minimise the impact of modern lifestyles on the environment.

You can easily identify our most sustainable and energy efficient products throughout this brochure as they will have a 'Green Technology inside' symbol displayed next to them. The difference that green technology can make in helping you live an easier, more convenient and more sustainable life can be seen in all of our appliances.

Green Technology **inside**

Washing machine – ActiveWater™
Bosch washing machines with ActiveWater™ technology measure exactly the right amount of water required for every load of laundry, so they never use a drop more than is needed.

†Annual consumption of £23.00 a year at an average energy cost of £0.154 per kWh.

Fridge freezer – A+++
Our most energy efficient fridge freezer has an A+++ energy efficiency rating, which means it costs less than 50p a week to run all year round[†].

Dishwasher – AquaStar
AquaStar dishwashers use just 6 litres of water (that's less than a sink full) to clean 13 place settings for a three-course meal.

Introducing the Bosch home laundry range.

The latest appliances from Bosch make it even easier and more convenient to deliver what you really want – perfectly clean clothes.

Illustration only. Actual washing machine fascia may vary.

Enjoy the quiet life.

We believe home appliances should be seen and not heard, that's why we've invented a range of high performance, ultra quiet products that won't disturb your life.

The sound of EcoSilence.
Our latest washing machines with **EcoSilence Drive**™ generate a noise level of just 49 decibels – that's quieter than the sound of the sea†. The modern world is noisy enough, so it's good to know that Bosch technology can help make the home environment a little oasis of calm.

EcoSilence Drive™ is an advanced motor producing maximum efficiency, economy, durability and performance whilst operating at exceptionally low levels of noise. We're so confident that it will deliver a quiet revolution that it comes with a **10-year guarantee.**

†On average, the sound of the sea is 55 decibels. 49-52 decibels for the normal wash cycle; spin cycle 71 decibels.

Save time. Save energy. With VarioPerfect™ you decide.

The battle against rising average energy and water bills* starts here with Vario**Perfect**™ technology.

With every household in the UK facing increased living costs and a reduction in that most precious commodity – time – here at Bosch we have developed Vario**Perfect**™ technology for all our freestanding washing machines.

Get full loads clean in just one hour** by selecting **SpeedPerfect** or select **EcoPerfect** and laundry comes out brilliantly clean using up to 66% less energy.***

*Infrastructure investment: the impact on consumer bills. National Audit Office Press Release, 13 November 2013.

**Compared to just over two and a half hours on Easycare 40°C wash programme.

***Compared to an EU label standard cotton 60°C programme.

Same laundry. Less water. Brilliant results.

ActiveWater™ can cut your water usage in half over a full year of washing compared to a 10-year-old appliance.

With all new homes being built with water meters in some parts of the UK*, and many existing households moving to metered water charges, reducing your water usage by such a significant amount doesn't just pay environmental dividends, it can also mean large savings on your utility bills.

Precise sensors on our ActiveWater™ models assess each load individually so only the exact amount of water is used. This means there's no longer a need for a half load programme. These models use 9,460 litres of water per year (based on average use). Older models use over 13,000 litres more for the same amount of laundry.

All the washing machines in our Serie 8 and Serie 6 ranges contain ActiveWater™ technology, making it easy to save water without compromising your lifestyle.

Why choose Bosch?

Top marks for energy efficiency.
Running costs are not the same
on every washing machine.
The most energy efficient models
are rated A+++ for energy efficiency
and the machines that use the
most energy are rated A. It may
be better to spend a little more
on an energy efficient model now
and save more money in the long run.

Brilliantly white every time.
AutoStain gets rid of grass, oil/butter,
red wine, blood and other tough
stains without the need to prewash or
use fancy stain removers.
So whatever you or your kids get
up to, the 4 special stain
programmes from AutoStain
(available on our new Serie 8
washing machine) will get your
clothes back in pristine condition.

Technology
inside

How do I choose the perfect washing machine?

You rely on your washing machine to keep pace with your family's laundry needs and to make sure your clothes always come out looking as good as the day you bought them, so it pays to spend a little time making sure you get the right one for your lifestyle. To help you choose the right washing machine for your home **Karl, the Bosch Engineer** has answered some of your most frequently asked questions.

Q: What size drum should I choose?

A: Machines with larger drums can take 7kg+ of washing. A typical 7kg load is made up of 35 men's shirts, or kingsize bed linen including 4 pillow cases. A 2kg load is typically made up of 10 men's shirts or the clothes you'd wear in a normal day. If you need to wash larger loads, consider a machine with at least a 7kg capacity.

Q: How can I get my washing done quickly?

A: No-one wants to spend more time doing the laundry. And for the really time-pressed, we've created the SpeedPerfect option, which reduces wash times by 60% – that means a 40ºC cotton wash will be ready in an hour.

Q: Do I need all of these programmes?

A: If you've invested a lot of money in your clothes or household linens, you can easily avoid destroying or damaging them by choosing the machine with the most programmes to suit your budget. Hand wash, delicates, silk, woollens, sports or other specialist programmes give the best possible care to specific items.

Q: What detergent gets the best results?

A: All detergents – when used with correct dosage – deliver good results. Powders and gels give more flexibility to get dosage levels correct, whereas tablets and liquitabs are more convenient. Liquids dissolve quickly and give good results at lower temperatures.

Q: Do I need to sort the laundry?

A: You should always sort your laundry by colour and care type and try washing similar colours and fabrics together. Spending a small amount of time sorting your laundry will ensure you get better washing results.

Q: How do I know which spin speed to choose?

A: Many machines allow you to change the speed of the spin on certain programmes. Higher spin speeds mean more moisture is spun out of the load and your clothes dry faster – handy if you need them in a hurry.

Q: How do I know it's exactly right for my home?

A: Whether you or your family members have allergies, play lots of sport, wear delicate clothing or have other specific needs, you can usually find a machine that can cope with whatever you throw at it. Most machines now come with a child lock on the door and control panel to protect them from wandering little fingers.

i-DOS. More washes between fill-ups.

Now there is a washing machine that adds detergent for you. And you don't have to lift a finger.

Green Technology **inside**

Serie 8 washing machine WAW28660GB

Energy A+++	-30%	9 kg

Spin	– 1400rpm
Key features	– EcoBar Plus function
	see how much energy and water
	you're saving
	– i-DOS
	adds detergent automatically
	– ActiveWater™
	use even less water
	– AutoStain removal
	removes stains
	– EcoSilence Drive™
	whisper quiet and reliable
	– VarioPerfect™
	save energy or save time
	– Time delay/Time remaining
	flexible washing

Add detergent once for around 20 washes and i-DOS doses each wash precisely every time.

Fully automatic.

For a normal wash, simply select the programme and the washing machine will do the rest for you. Sensors weigh the load, detect how dirty it is and then dose the detergent with millilitre precision. It even determines the length of the wash cycle and calculates the number of rinse and spin cycles. Perfectly clean laundry guaranteed for every load, all with minimum effort from you. Of course not all washes are "normal", which is why there is a wide choice of other programmes that wash everything from delicates to woollens.

Even more savings.

i-DOS doses each load with millilitre precision, which not only delivers outstanding results but a host of savings compared to manual dosing. Up to 11 litres of detergent and 7,000 of litres of water per year can be saved by eliminating overdosing and extra rinsing. It also cuts average cycle time by 14 minutes.

Manual programmes.

If you have a special or an unusual wash and need to override i-DOS, you can use the third compartment for the detergent. This is ideal for a quick freshen up, for special wool or delicates, or if you want to use powder.

Raising the bar in energy-efficiency.

Not only do our washing machines achieve great results for energy efficiency but now they can also show you how much you are saving. New for 2014, the intelligent **EcoBar Plus** function does the thinking so you don't have to. **EcoBar Plus** indicates five possible levels of energy and water consumption, depending on the programme or option you have selected for your laundry. The less LEDs illuminated, the more resource you are saving.

Save water. Save energy. With every load.

Boasting a better than A+++ energy rating and ActiveWater™ technology, this washing machine delivers an outstanding performance whilst saving water and electricity.

Green Technology inside

Serie 6 washing machine WAT28460GB		
Energy **A+++**	-30%	8 kg

Spin **Key features**	– 1400rpm
	– EcoBar
	see how much energy you're saving
	– ActiveWater™

	– Large LED display
	stay in control

Revolutionary ActiveWater™ guarantees that only the exact amount of water is used for every load, and never a drop too much.

See the energy you're saving.
The stylish LED display now has an **EcoBar** function that shows you five different levels of energy usage for your chosen cycle. So now you don't have to think twice about saving energy. Your washing machine does it for you.

Whisper quiet washing.
Now introducing the revolutionary **EcoSilence Drive**™ to the Serie 6 range. Quieter, faster and even more powerful, this brushless motor is our most energy efficient and long-lasting motor yet. We're so confident that we've given you a 10 year guarantee on it.

Night-night, sleep tight.
Make the most of your night time tariffs with the new **NightWash** programme. Running quieter than usual, this cycle won't keep you up and lets you wake up in the morning to perfectly fresh, clean clothes.

How to dry your laundry for the price of a coffee.

Our groundbreaking heat pump technology enables our Serie 8 tumble dryers to use less than half the energy of a standard tumble dryer that has an A energy rating. Incredibly, this means it costs less than £3 per month* to run. That's a month's laundry dried for about the price of a cup of coffee.

Our heat pump tumble dryers are so energy efficient that they have been awarded an A++ energy rating. What's more, they maintain that rating because they automatically clean out the excess lint and fluff that build up inside the condenser up to 4 times during a drying cycle. This is handy when other condenser tumble dryers on the market need to be manually cleaned after every 3 cycles. It saves you a job and you can have peace of mind because your tumble dryer will remain as energy efficient as the day you bought it, for its entire life.

Irregular cleaning of the heat exchanger leads to increased energy consumption.

BOSCH

SelfCleaning

Why choose Bosch?

Dried to perfection.
Too dry? Still damp? You don't need to worry anymore because the **sensordry** tells you when your laundry is ready so you can get on with other things. No extra energy is wasted on unnecessary heat either.

Beat the clock.
For times when you need dry laundry sooner, **Super Quick 40** will dry a small load, which is roughly 10 business shirts, in 40 minutes. It's sensor controlled for great drying results.
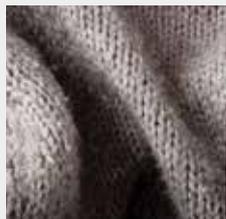

Caring for your clothes.
Clothes can be damaged from overheating and overdrying, so advanced sensor electronics monitor your laundry carefully and automatically stop once the desired level of dryness has been reached.

A gentle touch.
Feel confident about drying delicate items, because **low heat** protects items by lengthening drying time and reducing the temperature.

Condenser

How do I choose the perfect tumble dryer?

Modern tumble dryers offers a fast, energy efficient and convenient way to help you keep on top of the household laundry. Not only are they surprisingly cheap to run, but they can help protect your clothing and save you the time and effort of outside line drying or having to dry clothes indoors on rainy days. To help you choose the right tumble dryer for your home **Karl, the Bosch Engineer** has answered some of your most frequently asked questions.

Q: Are tumble dryers expensive to run?

A: Modern tumble dryers are much more energy efficient than you think. We have developed an energy efficiency rating of A++ on some Bosch tumble dryers so they cost less than £3 a month to run. And thanks to its self-cleaning condenser, your Bosch tumble dryer maintains its A++ energy efficiency without you having to do a thing.

Q: Are they noisy and will they keep disturbing us?

A: With its clever spiral design on the sidewalls of the tumble dryer, the AntiVibration Design™ increases stability and reduces vibrations. With improved insulation and low noise shock absorbers, it causes even less disturbance and gives you a whisper quiet machine.

Q: Will my delicate clothes get damaged?

A: You can place delicate items in the tumble dryer with complete confidence. Our low heat programme protects them by lengthening the drying time and reducing the temperature.

Q: Don't tumble dryers account for 98% of all lost socks?

A: Not any more. Introducing the innovative new tumble dryer drum light from Bosch. Because many tumble dryers are located out of the way in darker corners of the home, the integral light in the unit illuminates the inside of the machine when you come to empty it. Now there is nowhere for those socks to hide.

Q: Is there a difference between line drying and tumble drying?

A: Laundry that is hung out to dry picks up dirt from the air as well as allergens, far worse than everyday wear since it has to hang outside for hours to dry. Tumble drying is not only more hygienic for your clothes, but also for your house as drying indoors can lead to mould on the walls. Protect your home and your laundry.

Q: Is there a tumble dryer which makes ironing easier – I heard they can crease my clothes?

A: Our dryers have a reduced ironing cycle at the end of every programme which gentle separates and smoothes your laundry for the last 60 minutes. To really stop creasing, select the reduced ironing option which lasts 120 minutes for wrinkle-free laundry.

Q: What's the difference between vented and condenser dryers?

A: Vented tumble dryers work by venting the warm moist air from the drum through a pipe to the wall or an outside vent. Condensers pass the warm air into an easily accessible container which needs to be emptied. The key difference is that vented dryers need to be positioned near a wall so they can be vented out, whereas condenser dryers can be placed anywhere in your home.

Make saving energy effortless.

Drying your clothes doesn't have to cost the earth. Clever heat pump technology makes this one of the world's most ecological dryers by recycling the hot air for drying.

Serie 8 tumble dryer WTW87560GB

9 kg	Energy A++	SelfCleaning Condenser

Type **Key features**	– Self-cleaning condenser *cleans itself*
	– Heat Pump *use less energy*
	– Sensor drying *senses when laundry is dry*
	– Super Quick 40 *fast dry programme*
	– Low heat *for delicate items*
	– Sensitive drying *optimised design for extra care*
	– Time delay/time remaining *flexible drying*

Perfect pair.
Our matching Serie 8 tumble dryers and washing machines will sit perfectly together in your laundry space. Our modern designs are just as groundbreaking as the technology used inside.

Self-cleaning. So you don't have to.
To run at peak efficiency the tumble dryer's condenser needs to be kept clean. The ground-breaking automatic **self cleaning condenser** system uses water from the drying cycle to flush away lint and fluff, so you don't have to do it. That's one less job to worry about and it keeps the tumble dryer as energy efficient as the day you bought it.

More space for the clothes you love.
Now take clothes straight from the washing machine to the tumble dryer and get more dried at once. With a **9kg** capacity, the WTW87560GB can fit more in so now you won't have to leave clothes on the radiator or in the airing cupboard to dry.

Half the water consumption. Twice the laundry.

Few people realise just how much water a standard washer dryer will use during the drying process. The Bosch Serie 6 washer dryer changes this.

AirCondensation technology means this washer dryer can wash and dry almost double the amount of laundry with nearly half the amount of water needed in a standard washer dryer.

By using air to condense water from drying rather than pumping in cold water, the Serie 6 washer dryer uses just 57 litres of water to wash and dry a 4kg load. A standard washer dryer uses 100 litres to wash and dry a 2.5kg load. This means you can get twice the laundry done and get on with the more exciting things in life.

Why choose Bosch?

Forget about it.
Advanced sensors monitor your laundry and once it is perfectly dry, the **Autodry** will automatically end the programme. This saves energy being wasted and also means you don't have to keep checking your clothes to see how they are. When it's finished, you know they're dry.

Energy saving without the effort.
Not only does the Logixx washer dryer use half the amount of water compared to a standard machine, it is also more energy efficient. And because it has a **self-cleaning condenser**, you don't need to lift a finger for it to maintain its peak efficiency.

A pick me up for your clothes.
Ideal for freshening up items, **steam refresh** removes odours and creasing, so you save time on your ironing and cut down on expensive trips to the dry cleaners.
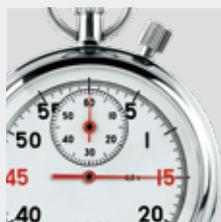

Turbo charge your laundry.
For those times when you need your laundry really quickly, selecting the **Super Quick 15** programme washes a small load of lightly soiled laundry in just 15 minutes.

Water saving technology. That's a breath of fresh air.

The Serie 6 washer dryer not only uses half the water consumption of a standard washer dryer, but it washes and dries almost double the amount of laundry.

Green Technology **inside**

Serie 6 washer dryer WVH28422GB

	– Time delay/Time remaining
	  flexible laundry

Available from December 2014

Do more washing and use half as much water as a standard washer dryer.

A condenser that cleans itself.
The **self-cleaning condenser** system flushes away lint and fluff, so you don't have to do it. That's one less job to worry about and it keeps the washer dryer running at peak efficiency.

Save time.
Super Quick 15 turns around a full wash in just 15 minutes. Designed for a lightly soiled 2kg load (that's roughly one outfit or 10 business shirts), this cycle packs in a wash, two rinse cycles and improved rinse spinning, making it one of the shortest complete wash programmes of any machine on the market.

At your command.
The simple but effective **time delay** allows you to delay your laundry. You can programme a wash and dry cycle in one go, so it is ready for when you want it.

Introducing the Bosch dishwasher range.

Discover Bosch's innovative German engineering,
such as Vario**Perfect**™ technology and **EcoSilence Drive**.™

Introducing our quietest ever dishhhh...washer.

Our **EcoSilence Drive**™ dishwasher is quieter than a rainstorm.

With the trend for open plan living in many modern homes, it's great to know that the latest Bosch dishwasher is one of the quietest on the market which means it will never disturb you when entertaining or relaxing. Producing just 38 decibels, it is quieter than a rainstorm – which can be as loud as 48 decibels.

Our **EcoSilence Drive**™ is an advanced motor producing maximum efficiency, economy, durability and performance whilst operating at exceptionally low levels of noise.

Model shown: SMS69L32GB

Two options, one result. Perfectly clean dishes.

With Bosch's Vario**Perfect**™ technology, you choose when you want to save time or save energy.

With average household utility bills set to rise for the next 15 years* and modern lifestyles leaving us all with less and less time, we developed Vario**Perfect**™ technology to put you back in control.

Save energy by choosing **Eco50** which cleans full loads using up to 33% less energy.** When you need to save time, select **VarioSpeed** which gets all your dishes perfectly clean in just 90 minutes – that's up to 66% quicker than a standard wash programme.

Logixx Serie | 8 ●●●●●

Our premium range.
Cutting-edge design meets advanced technologies. Exceptionally quiet with additional storage flexibility and versatile programming. Delivers optimum cleaning performance that is both energy and water efficient.

The new Serie 8 dishwasher takes our premium range to a new level, standing out from the crowd with cutting-edge features and extras such as **Zeolith** drying.

Exxcel ●●●●○

Our essential range.
Advanced technology with energy and water saving features ensure you save time, money and resources.

Classixx ●●●○○

Our practical range.
Entry-level models that combine practical features and Bosch build quality in a consistent, value for money package.

*Infrastructure investment: the impact on consumer bills. National Audit Office Press Release, 13 November 2013.

**Energy consumption 299kWh on Eco50 programme compared to 448kWh on Auto 65-75 programme on SMS69L32GB.

Save water every load.

It takes just 6 litres* of water for our AquaStar dishwashers to clean 13 place settings for a three-course meal**. That's less water than it takes to fill a standard-sized kitchen sink.

The water saving is all down to ActiveWater technology, which makes water work harder. Clean rinse water is recycled into the main wash cycle, and water is filtered back into the wash cycle even faster so less of it is needed.

AquaStar dishwashers are available in our Exxcel range and as well as saving water, their A++ rating will save you money on your energy bills too. A solution that uses little energy and water to make life easier. It's no wonder dishwashers are becoming a must have in the kitchen.

Model shown is MCSA00553503

Why choose Bosch?

Zero to clean in 20 minutes.
Make sure you keep up with large parties or family gatherings, and keep clean glasses, crockery or dishes flowing as quickly as the conversation. **TurboSpeed** gets partyware clean in just 20 minutes[†], and dried in a further 10 when you select the Extra Dry option.

Easy loading.
Foldable racks allow the dishwasher to be adapted to any load, whilst still securing everything in place. The adjustable **Rackmatic™** system allows the upper basket to be moved up and down to fit more in the top or bottom basket as required.

10-year anti-rust warranty
Our appliances are made from top quality materials and in addition to our standard appliance warranty, we provide a **free of charge warranty** against rusting-through of the dishwasher's inner cavity.

* 6 litre water consumption on standard Economy 50ºC programme.
** Three-course meal as defined by dinner, soup and dessert plate, cup and saucer, glass, knife, fork, soup, tea and dessert spoons for each place setting as well as 1 serving plate, 2 serving bowls, 2 serving spoons, 1 serving fork and 1 sauce spoon.
† Initial pre-heat time of 25 minutes required, then can be used again and again.

How do I choose the right dishwasher for me?

Dishwashers save you the chore of washing-up by hand, and also help keep your kitchen looking cleaner and clutter free. With a wide range of full-size, slimline and compact models to choose from, Bosch offers you a dishwasher to suit your home. To help you choose the right dishwasher for your home **Karl, the Bosch Engineer** has answered some of your most frequently asked questions.

Q: Which is the best cleaning method – by hand or in a dishwasher?

A: Tap water used for hand washing is generally not a very high temperature, and washing up liquid is relatively mild because both come into contact with your skin. Dishwashers, on the other hand, heat water up to over 70ºC which is more effective at removing bacteria, and dishwasher detergent contains different ingredients that target stains and food residues. Some of our dishwashers also have a Hygiene option, which uses a longer, hotter, final rinse for chopping and cooking utensils. In short, you'll get better results with less effort from a dishwasher than from handwashing.

Q: Do I need to stack the dishwasher in a certain way to get the best results?

A: To get the best results, we recommend larger dishes and tall items go in the bottom rack with their dirty surfaces facing the centre and any openings facing down. The top rack should be reserved for smaller items, such as cups or glasses, or those that are less dirty. The top basket can be adjusted when fully loaded to create extra space if needed for taller or bigger items in the bottom rack. The racks that keep plates securely in place can also be folded down so you can accommodate larger items or pans.

Q: How much space do I need for a dishwasher?

A: The smallest models are our compact dishwashers. These are not much bigger than a microwave and can sit on a worktop or shelf. We also have a range of slimline dishwashers which are the same height and depth as full size models, but at 45cm across they are just two-thirds of the width and perfect for slotting into narrow spaces. Finally, we have our standard size models with the widest range of water and energy saving features.

Q: Which size is best for me?

A: If you use a lot of dishes, for example if you have a large family or you regularly cook and entertain at home, you should consider a standard size dishwasher as these can easily hold between 12 and 14 three course dinner place settings. Their flexible settings also allow you to use them for larger pots and pans, as well as delicate items such as glassware. If you live on your own, or in a smaller household with limited space, then a compact or slimline model might cope with all your dishwashing needs.

Q: Will I have to wait long for the dishwasher to finish every time?

A: No. If you need your dishes quickly, you can have light loads clean within 20 minutes thanks to our TurboSpeed programme. A normal, full load can also be cleaned more quickly if you select the VarioSpeed or VarioSpeed Plus option. When you're not in a rush, you can save energy by selecting the Economy 50°C programme which uses less energy.

Bosch recommend Finish.
Bosch have tested and recommend using Finish dishwashing products. For an amazing shine and clean on all your dishes and cookware, Bosch recommend new Finish Quantum with PowerGel.

Super fast. Super efficient. Super choice.

Our dishwashers can clean a full load of dishes with just 6 litres of water (that wouldn't even fill a kitchen sink). That's a starter, main and dessert for 13 people perfectly clean.

Green Technology **inside**

Exxcel dishwasher SMS65E32GB		
12+1	Energy A++	Anti-Rust

Key features	– VarioFlex Plus baskets *flexible loading* – TurboSpeed *20 minute washes* – 44 decibels* *EcoSilence drive*™ – 6 programmes *a wash for every load* – VarioSpeed *faster wash times*

*dB (re 1pW)

Never run out of glasses and dishes again when it's your turn to entertain.

Whisper quiet.
Ultra quiet, this dishwasher won't disturb you or your family so you can run it whenever you want.

Get your dishes done quickly.
Never run out of glasses and dishes again when it's your turn to entertain when you use the **TurboSpeed** programme. It washes lightly soiled items like cups, glasses and dishes in just 20 minutes so you can get back to the party.

2 washes in 1.
Delivering an intensive 70ºC wash on the bottom basket whilst the top basket carries on as normal, the **Intensive zone option** will clean baked on pots and pans, glasses and dishes at the same time. There's no need to wash 2 loads or to slip on the rubber gloves and wash half up by hand.

Tall fridges	Tall freezers	Fridge freezers	American style fridge-freezers	Wine coolers	Chest freezers

Stay cool when your energy bill arrives.

Model shown is KGN36XI42.

Fridges and freezers need to be on 24 hours a day, 365 days a year. Luckily, our most energy efficient fridges have an A+++ rating, which means they only use half as much electricity as it takes to power an energy saving light bulb*.

We rely on our fridge freezers day in, day out. As a result, they can use up to 17% of the total electricity in your home. If your fridge freezer is over 15 years old, it could however be using up to three or four times more electricity than a new, more energy efficient model**. By replacing your old appliance with a new model that has an A+++ energy efficiency rating – which we have available even in our entry-level Classixx range – you could save up to £250 in five years***.

Why choose Bosch?

Another job off the list.
Never worry about having to defrost the freezer again. The **NoFrost** system prevents the build up of ice by automatically initiating the defrost operation only when it's needed. This also helps to maintain the appliance's energy efficiency.

Fresher for longer.
The **CrisperBox** preserves fruit and vegetables for longer, keeping them fresh and nutritious. If you can't get to the shops regularly, your food not only retains more of its freshness and health benefits but its built-in slider makes adjusting the humidity very simple.

Extra safe storage at the touch of a button.
Putting away the weekly shop once you get it home can cause fluctuations in temperature and make the rest of the food warmer. Activating the **SuperCool** or **SuperFreeze** function before you go shopping lowers the temperature for a short period so anything new put in the fridge or freezer is chilled or frozen quickly.

You'll never need to buy bottled water again.
Modern families drink on average 2.5 litres of filtered, bottled water each day. Tap water is cheaper and uses less packaging, so we combined the best of both worlds by introducing a **Brita filter** into our fridge freezer range. It has a 2.5 litre capacity which makes it quick and easy to enjoy filtered water at home any time.

*   Energy saving light bulb uses 157kwh, KSV36AW41G uses 75kwh per year.
** Source: www.sust-it.net.
***Based on an equivalent Bosch 15 year old model KGS3703 and 14p per kWh (source: energy.eu).

Finding the right fridge freezer for me.

Making the right choice of fridge freezer is crucial as it is going to be the most important, and most used, appliance in your kitchen. As well as having sufficient space, you also need to make sure the appliance fits in with the way you will feed yourself, family and friends. To help you choose the right fridge freezer for your home **Karl, the Bosch Engineer** has answered some of your most frequently asked questions.

Q: What's the first thing I should consider?

A: The first thing you should consider is where you're going to put your fridge freezer and how much space you've got. An under-counter fridge would probably work best in a small or fitted kitchen. A larger space would allow you to consider a model with more capacity, such as an American-style fridge freezer, which can be freestanding so you can take it with you if you move. Large families or busy households might also consider a separate chest freezer, which can be housed in a garage or utility room if there is not enough space in the kitchen.

Q: There are lots of different models with different capacities. How do I know which is the right one for me?

A: You can make the decision easier by looking at how you currently live at home. If you live on your own, in a small household or tend to eat out more than at home, then a small fridge might be sufficient. If you buy a lot of frozen food products, or regularly cook and freeze a large amount of homemade food, a small fridge with an ice box is unlikely to deliver what you need. Space may dictate that you cannot have a tall appliance, so therefore look at choosing a separate under the counter fridge and freezer. Bigger households need larger capacity models, such as an American-style fridge freezer, to ensure that the weekly shop can be quickly, neatly and safely stored away.

Q: Should I pay much attention to energy efficiency ratings?

A: Yes. Whichever model you choose, it will be on all day, every day and will be constantly using electricity that you will be billed for. Our most energy efficient fridge freezer models are rated A+++ and can cost as little as £22 a year* in electricity charges. Compare that to a similarly-sized 10-year-old model which could cost as much as £74. And you don't need to choose the top-of-the-range models to benefit from A+++ energy efficiency. You'll find them across our Classixx, Exxcel and Logixx ranges.

Q: What features will help me keep my fridge/freezer neat and tidy – and allow me to easily access items when I need them?

A: Bosch fridge freezers are designed around the needs of modern households and families. For example, integral bottle racks stop bottles rattling around on shelves or in the door, and they don't take up a whole shelf either. Adjustable shelves and fully extendable drawers make it easy to move things up and down, and in and out, maximising the space to fit around the items you buy each week. There is also a BigBox in the freezer that can cope with large items such as the Christmas turkey, so you don't need to rearrange everything else in the freezer every time you buy something big.

Q: Does it matter where I store particular foods?

A: Yes. The top shelves are the best place for storing cheeses, cooked meats and fish. Middle shelves are ideal for dairy products as well as any leftovers. You should always put raw meats or fish, as well as other highly perishable foods, on the lower shelves where it's coolest. When it comes to the door, butters, jams and salad dressings are best stored on the upper rack, condiments, pickles and eggs in the middle and taller, heavier items such as milks and juices at the bottom.

*Based on an annual consumption of 149kWh as stated on the EU energy certificate at a cost of £0.154 per kWh on Exxcel model KGE36BW41G.
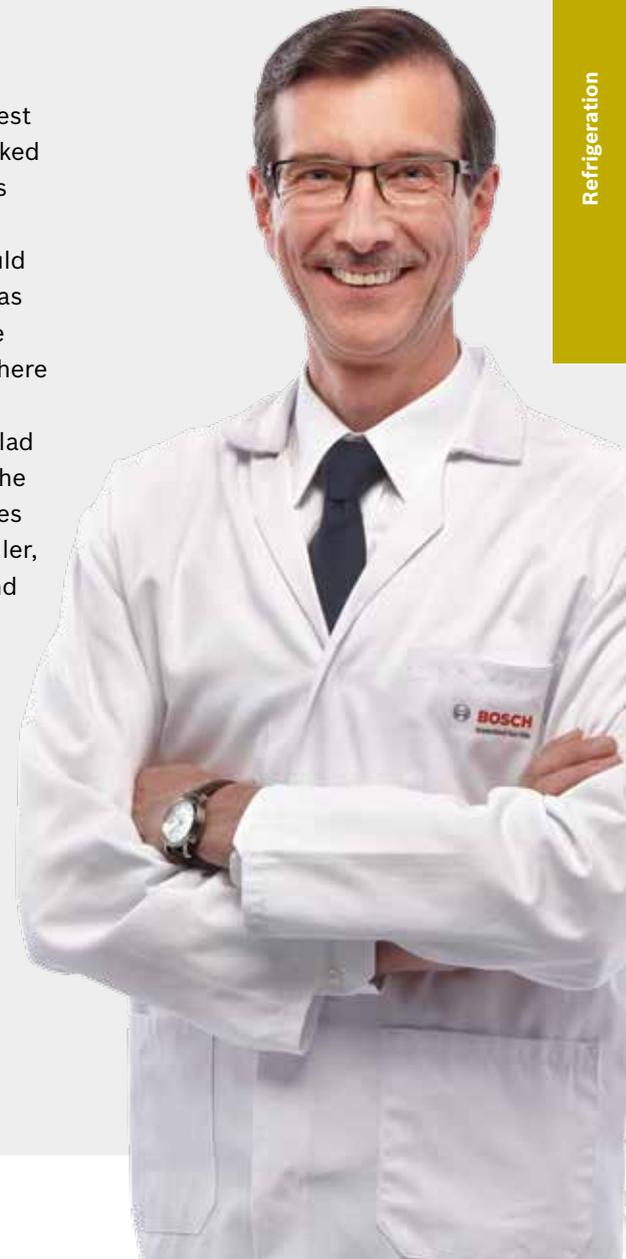

The A-Z for your fridge.

It's estimated the average household throws out £480* worth of food a year (rising to £680* for a family with children). Ensuring your food stays fresher for longer stops you wasting money and making unnecessary trips to the shops. By creating a range of optimal storage environments in every fridge we make, it's easy to store your food in the right place, so it ends up being eaten or drunk rather than in the bin.

Top shelves.
The best place to store hard cheeses, ready meals, cured meat or fish products and drinks.

Upper door racks.
The highest temperature level in the fridge, just right for butter, margarine, jams, salad dressings and hard cheese.

Middle shelves.
Perfect for dairy products such as cream, yoghurts and soft cheese, as well as leftovers and opened canned goods.

Lower shelves/ChillerBox.
This is the coldest section of the fridge and is ideal for highly perishable foods such as raw meat, meat products, poultry, fish, seafood and raw egg products. Look out for models with a ChillerBox. It's 3-4ºC cooler – perfect for meat.

Lower door rack.
Provides a strong and secure home for bottles and tall items that need to be stored upright.

Middle door rack.
Great for condiments and pickles. Eggs are kept safely in place by the built-in egg racks.

A+++

ChillerBox

This fridge freezer is extremely energy efficient and will cost less than £27 per year* in electricity to run.

Freeze energy costs.
Fridge freezers are plugged in 24 hours a day, 7 days a week, so it's especially important for them to be energy efficient. Boasting an impressive A+++ energy rating, this fridge freezer is extremely energy efficient and will cost less than £27 per year* in electricity to run.

Perfect, crisp, fresh food.
Preservation technology takes care of your food so it stays fresh and nutritious for longer. This means food doesn't get thrown away and there's fewer trips to the supermarket. The **ChillerBox** has a lower temperature than the rest of the fridge making it perfect for meat and fish, which are some of the most expensive items in the fridge. Fruit and vegetables will stay fresh in the **CrisperBox** which has a manual humidity controller to stop food drying out, and a rippled base for improved air circulation.

Stylish design.
Bringing style to the kitchen, this contemporary fridge freezer also features in-door electronics for precise temperature control. The interior is just as stylish as the outside, with metallic finishes, **LED lighting** for perfect illumination and a chrome bottle rack.

Refrigeration

*Based on an annual consumption 172kWh at a cost of £0.154 per kWh.

Run this fridge freezer for 6p per day*.

This Exxcel fridge freezer is simple and practical, yet has the best of Bosch with a super-efficient A+++ energy rating and advanced preservation technology.

	  freeze large, bulky items
	− FlexiShelf
	  to accomodate taller items

This Exxcel fridge freezer costs around 6p per day* in electricity to run.

Green thinking.
Our energy saving ideas aren't limited to models in the top of the range. This Classixx fridge freezer costs around 6p per day* in electricity to run.

Making food last longer.
Meat, fish and vegetables stay fresh and last longer in the specially designed compartments. The **ChillerBox** has a lower temperature than the rest of the fridge, perfect for meat, fish and extra cool drinks. The **CrisperBox** has a manual humidity slider to prevent food drying out, and a rippled base for improved air circulation, making it ideal for storing fruit and vegetables.

Keep cool.
Loading the fridge with new food can cause fluctuations in temperature and make the rest of the food warmer. Activating **SuperCool** reduces the temperature to prevent the food inside warming up and quickly cools new food.

*Based on an annual consumption 149kWh at a cost of £0.154 per kWh.

Refrigeration

It's better with Brita.

Ideal for busy households, the Brita water filter
makes it easy to access water.

Green
Technology
inside

Classixx Brita model KGW36XL30G		
	LowFrost	Energy A++
Freezer type **Key features**	– LowFrost – Brita water filter *fresh filtered water* – CrisperBox *fresh fruit and vegetables* – SuperFreeze *faster freezing* – Electronic temperature control *precise temperature control* – LED light *perfect illumination* – Bottle rack *secures bottles* – BigBox *freeze large, bulky items*	

Help yourself to fresh, cool water any time.

Cool, filtered water any time
The **Brita water filter** has a 2.5 litre capacity and still leaves room for bottles and cans in the fridge. It couldn't be easier for families to help themselves to fresh, cool water.

Fresher food.
Complete with 37% more storage space, the **CrisperBox** preserves fruit and vegetables so that they stay fresh for longer. The manual humidity slider prevents food drying out and the rippled base improves air circulation. To make it even easier to access, the drawer slides all the way out so you can even reach items all the way at the back.

Faster freezing.
Loading the freezer with new food can cause fluctuations in temperature and make the rest of the food warmer. Activating **SuperFreeze** reduces the temperature to keep food that's already in the freezer frozen and freeze new food quickly and effectively. Food is protected even when the door is left open for longer periods.

Small and perfectly formed.

Our award-winning range of appliances isn't just restricted to large models. We also design and engineer high-quality vacuum cleaners, irons, steam generators, drinks machines, kettles, toasters and food preparation appliances. As you would expect from Bosch, they are packed with innovative technology and deliver the same levels of performance, build quality and reliability as our large appliances.

Models shown are:
Iron TDA5070GB
Food processor MCM68861GB
Bagless vacuum cleaner BGS5SIL2GB.

Not just any old iron.

As you would expect from a top-of-the-range model, a Bosch iron is packed with labour-saving features. And the ergonomic design means it's not just more comfortable to use, but also doing the ironing is an effortless task.

Iron TDA5070GB					
3050 W	3AntiCalc	2AntiCalc	Advanced Steam System	3m	
Key features	– Built in Anti'Calc system – Huge 200g/min steam shot and 50g/min steam output – CeraniumGlissée ceramic soleplate – Ergonomic design and precision tip				

Glide through your ironing.
A powerful 3050W, Advanced Steam System with huge 200g/min steam shot smooths out any crease in an instant and means tackling your ironing pile has never been easier.

Designed with comfort in mind.
The soft touch handle with convenient thumb rest makes ironing both quick and comfortable. The ergonomically shaped big buttons ensure the iron does the hard work, not you.

Which?
Steam Irons June 2013

The new steam revolution.

Our revolutionary steam generators don't just look fantastic – they are some of the most powerful in the world, allowing you to speed through even the largest, toughest ironing piles.

Steam generator TDS4571GB					
	3100 W	DeepSteam	Calc'n'Clean Timer	Advanced Steam System	Easy carry
Key features	– Huge 400g/min steam shot – Electronic Touch Control – SecureLock – easy carry – Advanced Calc ˙ n ˙ Clean – 6 bar pressure – i-Temp temperature control – AntiShine function				

Half the time, half the effort.
Save time and carefully look after all your clothes with i-Temp, which means you don't have to change temperatures for different fabrics. The SecureLock system for carrying and auto shut-off gives additional peace of mind.

Ultimate power in your hands.
A high 6 bar pressure and 400g/min steam shot ensures incredibly fast ironing and, using the vertical steam function, makes it quick and simple to freshen up garments or iron curtains.

Small appliances

High performance cleaning with superb reliability.

Our range of bagged and bagless vacuum cleaners is proof that you get the same level of Bosch technology in our small appliances as you get in our larger ones.

Perfect for pet owners.
The unique turbo brush makes picking up after your pets even easier, and keeps your furniture and upholstery pet hair free.

Keep your home clean and fresh.
HEPA and bionic filtration not only traps fine dust particles that can irritate hayfever and other allergy sufferers, but also reduces pet odours.

Incredibly powerful. Incredibly quiet.
Turning up the power doesn't mean you have to turn up the noise. This is the quietest bagless cylinder cleaner on the market* so you can use it anytime without disturbing anyone.

Bag our new bagless.
Technology in our new range of bagless vacuum cleaners ensures that whichever model you choose, it will maintain its energy efficiency and vacuuming performance for life.

Bagged vacuum cleaner BSGL5PT2GB Power Animal 2	
Key features	– HEPA and bionic filter – Unique turbo brush, perfect for pet hair pick-up – Adjustable floor tool for all floors – Large 4.5 litre capacity – Energy efficiency class: C – Dust re-emission class: A – Cleaning performance carpet: B – Cleaning performance hard floors: A

Bagless vacuum cleaner BGS5SILGB Power Silence 2	
Key features	– The quietest bagless cylinder cleaner on the market* – Incredibly quiet – 66 decibels** – SensorBagless technology – HEPA filter – Energy efficiency class: A – Dust re-emission class: A – Cleaning performance carpet: C – Cleaning performance hard floors: A

*Independently tested against the top 10 best selling bagless cylinder cleaners, according to GfK Sales Data September 2011-August 2012. Test standard IEC 60704-2-1:2000. For more information on test results, please visit www.bosch-home.co.uk. **66dB (re 1pW).

Agility on all floors.

Athlet. The new cordless, bagless upright with the same cleaning performance as a conventional vacuum cleaner.*

☑ **Cordless**
☑ **Powerful**
☑ **Lightweight**
☑ **Agile**

Ultra light.
Weighing just 3kg, the Athlet is light and easy to use all around the home.

EasyClean.
The Athlet requires no bag changes. It's a quick and simple task to remove, empty, clean and replace both the dirt container with filter unit and brush roll.

Maximum flexibility.
An extremely manoeuvrable nozzle joint means the Athlet can easily glide around or under furniture and by removing power cables completely, there is nowhere in the home it cannot reach.

The programme cotton cupboard dry used at full and partial loads is the standard drying programme to which the information on the energy label refers.
This is the most efficient programme in terms of energy consumption for cotton.
Annual consumption is based on 160 drying cycles.

Data valid in this table as of October 2014. Subject to modification without prior notice.

Key to accessories: SGZ1010: Aquastop extension, **SGZ3003**: Silver polishing cassette, **SMZ5001**: Bottle and small parts holders, **SMZ5002**: Silver polishing cassette, **SMZ5100**: Adjustable cutlery basket

[1] Based on 280 standard cleaning cycles using cold water fill, including consumption of the standby mode.
[2] The consumption per cleaning cycle of the "Eco 50" programme using cold water fill.

Water pressure required: 0.5-10 Bar. Flow rate: 10 litres per minute. Inlet valve connected directly to ¾" screwed joint.

[3] We would recommend our dishwashers are connected to the mains water supply where possible. However, they may also be connected to an external water softener as long as the water softener produces softened water of less than 1.1 mmo/litre (7.0°e) and the water softener in the appliance is turned off. Please contact product advice for further information.

All models comply with COMMISSION REGULATION (EC) No 1275/2008 with regard to ecodesign requirements for standby and off mode electric power consumption.

Data valid in this table as of October 2014. Subject to modification without prior notice.

[1] EC rating scheme designed to compare energy efficiency of comparable appliances.
[2] Climate Class SN: Room temperatures +10°C to +32°C
Climate Class N: Room temperatures +16°C to +32°C
Climate Class ST: Room temperatures +18°C to +38°C
Climate Class T: Room temperatures +18°C to +43°C
[3] ✱✱✱✱ Freezer at -18°C or less, for fresh & frozen food.
[4] Freezer capacity quoted may only be attained by switching to constant operation and not on a 24 hour basis.
[5] Temperature increases from -18°C to -9°C, time taken is when appliance is full. When only partially stocked, less time is involved.
[6] Actual energy consumption will depend on how the appliance is used and where it is located.

As a guideline A++ means very economical, A+ economical, A is average, and B-G represents a high consumption. Consumption rates are quoted to assist comparisons for different appliances. During actual operation, consumption may vary slightly. All cooling appliances require adequate ventilation (min. 200cm²) Please refer to user / installation instructions. Wine coolers require a ventilation distance of 4cm around the appliance for optimum performance on installation.
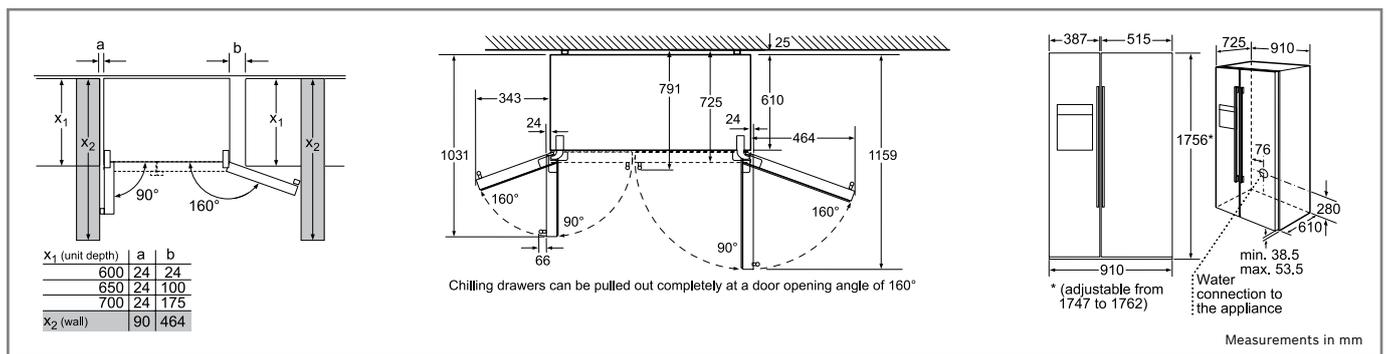

Data in this table valid as of October 2014.
Subject to modification without prior notice.

American Style Fridge Freezers

Chilling drawers can be pulled out completely at a door opening angle of 160°

* (adjustable from 1747 to 1762)

Water connection to the appliance

Measurements in mm

KAD62V40GB | KAN62V41GB **N.B.** Doors need to be able to be opened to a minimum of 160° angle to allow the drawers to be fully accessible

Water connection to the appliance

Drawers can be pulled out with door opened to 90°. Drawers can be removed with door completely opened.

* If the appliance is placed next to a cooker, the side distance must be 76mm minimum.

** If the water connection is directly behind, observe the depth of the connection.

Measurements in mm

Measurements in mm

KAN58A55GB **N.B.** Doors need to be able to be opened to a minimum of 135° angle to allow the drawers to be fully accessible

[1] EC rating scheme designed to compare energy efficiency of comparable appliances.
[2] Climate Class SN: Room temperatures +10℃ to +32℃
Climate Class N: Room temperatures +16℃ to +32℃
Climate Class ST: Room temperatures +18℃ to +38℃
Climate Class T: Room temperatures +18℃ to +43℃
[3] ✶✶✶✶ Freezer at -18℃ or less, for fresh & frozen food.
[4] Freezer capacity quoted may only be attained by switching to constant operation and not on a 24 hour basis.
[5] Temperature increases from -18℃ to -9℃, time taken is when appliance is full. When only partially stocked, less time is involved.
[6] Actual energy consumption will depend on how the appliance is used and where it is located.

As a guideline A++ means very economical, A+ economical, A is average, and B-G represents a high consumption. Consumption rates are quoted to assist comparisons for different appliances. During actual operation, consumption may vary slightly. All cooling appliances require adequate ventilation (min. 200cm²) Please refer to user / installation instructions. Wine coolers require a ventilation distance of 4cm around the appliance for optimum performance on installation.

Data in this table valid as of October 2014.
Subject to modification without prior notice.

[1] EC rating scheme designed to compare energy efficiency of comparable appliances.
[2] Climate Class SN: Room temperatures +10℃ to +32℃
Climate Class N: Room temperatures +16℃ to +32℃
Climate Class ST: Room temperatures +18℃ to +38℃
Climate Class T: Room temperatures +18℃ to +43℃
[3] ★★★★ Freezer at -18℃ or less, for fresh & frozen food.
[4] Freezer capacity quoted may only be attained by switching to constant operation and not on a 24 hour basis.
[5] Temperature increases from -18℃ to -9℃, time taken is when appliance is full. When only partially stocked, less time is involved.
[6] Actual energy consumption will depend on how the appliance is used and where it is located.

As a guideline A++ means very economical, A+ economical, A is average, and B-G represents a high consumption. Consumption rates are quoted to assist comparisons for different appliances. During actual operation, consumption may vary slightly. All cooling appliances require adequate ventilation (min. 200cm²) Please refer to user / installation instructions. Wine coolers require a ventilation distance of 4cm around the appliance for optimum performance on installation.
