IS A PASSION

The Professional's Choice

Professional STYLISH COOKERS

Our range of kitchen appliances continually sets out to inspire the passion in you. From an amazing array of colours to a stylish selection of modern trims you can pick a cooker that looks the part in any kitchen. You could say that Falcon cookers really are a modern masterpiece for any home.

Stemming from a long standing heritage in professional catering equipment, the commercial pedigree of the Falcon brand is clearly evident throughout the range. Each product brings to the domestic kitchen the build quality, design flair and high performance expected by the professional chef making Falcon the ideal choice for those who share our passion for both food and style.

The Professional's Choice

Stop dreaming... **START COOKING!**

"My love affair with Falcon began more than 25 years ago, when I was training to be a professional chef and would practice recipes and techniques at home on a second-hand Falcon range cooker I bought locally. I've never looked back, and now have Falcon range cookers at both my cookery school in Scotland, and of course have the latest model in my family home.

Perhaps the most important aspect of any cooker, and an area in which Falcon's range cookers excel, is responsiveness. The gas burners are fast to react, bringing dishes up to boiling point with speed and maintaining even temperatures with ease. The ovens also have extremely quick heat-up times and are exceptionally reliable with no cold spots or temperamental behaviour.

I especially love the robust cast iron pan supports that allow me to bang pots around without worrying about damage, and they maintain a level surface over time, which is important for ensuring even heat distribution over the entire base of a saucepan.

I would never endorse a product that I don't believe in 100% and during my entire professional career, and at home, Falcon has never let me down."

Nick Nairn

"I now have 12 Falcon range cookers at my cookery school in Port-of-Menteith, 14 in my new Aberdeen School, and of course have the latest model at home."

Made in
**GREAT
BRITAIN**

Made in
**GREAT
BRITAIN**

Falcon appliances prides itself on its British heritage and roots within the commercial kitchen scene. Manufactured in Royal Leamington Spa, our outstanding selection of range cookers are crafted and developed to the highest standard, all heralding the beauty of British design.

Cooking POWER!

Offering the choice of powerful gas hob, or sleek look induction top, the Falcon range provides you with ultimate control and superior performance.

Falcon cookers will let you indulge in your favourite culinary dishes with their two large high performance ovens*. Both the multifunction and fanned oven are complete with stay-clean removable liners. The robust dual circuit grill features a fully extending gliding tray.

*900S is an exception with one large cavity.

Dual Fuel

Offers five professional standard burners, including a 5kW central burner, essential for the high temperatures needed to create wonderful stir fried dishes.

Falcon dual fuel hotplates feature a one piece burner head and individual pan supports for easy cleaning and reassembly.

All dual fuel models are manufactured with Flame Supervision Devices (FSD'S) as standard.

Induction

Fast, responsive and incredibly controllable, induction cooking is becoming increasingly popular. Incorporating a wealth of safety features, our induction hobs offer by far the most efficient choice.

Falcon Cook Top

The cook top allows you to use several saucepans at the same time, making use of all the surface area of the plate, as the heat intensity decreases as you move outwards from the centre.

The MULTIFUNCTION OVEN

The multifunction oven offers seven functions for really flexible cooking. From crisping up the base of your pizza to browning your favourite pasta dish!

Functions include:

- ❄️ **Defrost** - An incredibly safe way to speed up the defrosting process, as it uses the fan to circulate unheated air, so won't accidentally cook the food like a microwave can.
- 🌀 **Fan Oven** - A fan oven draws air from the interior of the oven, heats it up and forces it back into the cavity again. The heat within a fan oven is evenly distributed for multi-level cooking.
- 🔥 **Fanned Grilling** - Enables the door to be closed while grilling, which grills food more evenly, while preventing cooking smells from permeating the room.
- 🔥 **Fan Assisted Oven** - Utilising the conventional oven elements alongside the fan, this produces zoned cooking with the hottest zone being featured at the top of the oven.
- 🔥 **Conventional Oven** - This traditional cooking method uses heat sourced from both the top and bottom of the oven, which results in a natural convection process that centres the heat in the top of the oven.
- 🔥 **Browning Element** - Great for browning off pasta or dishes that are topped with cheese to create a perfect finish to your dish.
- 👤 **Base Heat** - Using the lower element only, this cooking method is often used for slow-cooking casseroles and can also be used to give a crispy base to your pizza.

The Falcon 'GLIDE'

Our Falcon grill is manufactured to make grilling a breeze. A seamless glide action grill rolls out to reveal four height settings and a solid durable grill tray, to allow finishing a crème brûlée or grilling a simple rarebit to resemble a masterpiece.

*On all models except the Continental and 900S.

Why choose INDUCTION?

As the newest and fastest growing fuel type, induction hobs offer speed, control and energy-efficient credentials being powered by electro-magnetism. As opposed to other electric hob technologies such as Ceramic and Sealed plate which are often regarded as less controllable and slower to heat up than gas, Induction really is a leap in cooking technology.

Induction features:

- Power boost feature
- 9 power settings giving instant response and full controllability through rotary controls
- Auto switch-off
- Residual heat indicator
- Child lock
- Overheating detection

Energy Efficient

Since all the heat is directed on the pan, you don't lose any around its perimeter so you are making over 90% use of the heat available, compared to just 55% for a gas hob. Built-in pan recognition sensors automatically turn the hob off when not in use, thus saving energy and increasing safety.

Safety

The hob surface itself retains minimal heat, making it safer for those with young children. Most induction hobs will also have a child lock feature on its controls. Pan detection will also provide peace of mind for curious children (or forgetful adults!) by switching off automatically when a pan is not present.

Easy to Clean

Since the hob top stays cool, spillages will not stick or burn onto the surface, making cleaning a simple wipe-down affair.

'Falcon induction cookers are the best on the market. It's what I use at home – a 1092 Deluxe Induction. They have so many great features, from the proper robust knobs to set the hob temperature, to the oh-so-easy-to-clean surface, to the brilliant roll-out grill, not forgetting the utterly stable temperature of the ovens. Induction uses less energy than other methods and is so quick. Love it!'

Nick Nair

People with cardiac pacemakers or implanted insulin pumps must make sure that their implants are not affected by the induction hob (The frequency range of the induction hob is 20-60kHz).

It's all in the **DETAIL**

We have fine-tuned the detail of Falcon range cookers, ensuring the quality seal you would expect from a semi-professional range. Our cookers are made from a thick 1.2mm gauge stainless steel, responsible for that oh so satisfying door 'clunk', our burners are solid brass and in one piece for ease of cleaning, and unlike most hob and cooker panels, our controls are ink moulded and injected onto a chrome plate for a dazzling professional finish made to last, rather than painted straight onto the fascia – and if this doesn't convince you of the quality standard Falcon cookers exude, the statement stainless steel one-piece hotplate certainly sets this range apart with your choice of gloss or matt pan supports.

Colour **INJECTION**

We know you have a passion for cooking, so we also know how important it is for your kitchen kit to match your personal style, this is why we have introduced eight stunning colour variants to ensure your range cooker suits you. Go retro with ice white, or pay homage to Falcon's commercial roots with a stainless steel model, even create your dreamy kitchen scene with a soft china blue cooker, and because we care about the finer details, we have a range of coloured hoods to match too.

The FAMILY

As the star of your kitchen, a Falcon range cooker is not only built to perform, it's designed to look the part too. Our impressive range offers a stylish selection of colours, from vibrant Cherry Red to Classic Cream in a variety of widths and layouts to suit your cooking personality.

The Falcon 1092 DELUXE

The 1092 Deluxe has become a favourite in UK kitchens because of its stylish design, combined with professional build quality and durability. The sought after 1092 Deluxe features a superior, smooth operating Roll-out grill, which allows you to turn your food safely, whilst offering four variable height settings, heavy-duty control knobs, and an array of colour options.

The Falcon 1092 CKR

It has often been said that a Falcon range cooker offers the nearest thing to a commercial cooking experience in the home. The 1092 CKR embodies Falcon's wider commercial heritage, delivering an appliance on which you can not only cook like a professional, but has all the looks of a true commercial range as well.

The Falcon 900S SINGLE CAVITY

Our revolutionary 900mm-wide range cooker features a unique energy saving panel (E.S.P) that allows you to split the oven in half - creating a truly flexible appliance, which offers the best of both worlds. Its 108 cubic litre (full capacity) oven is ideal for large family dinners, but it quickly transforms into a compact, economical single oven for smaller meals.

With the E.S.P in place, the right hand oven can be used to cook in exactly the same manner as the full oven with identical functionality. Whether you are using the full size or divided oven, you have access to an impressive seven functions, including fan assisted and defrost settings. This fabulous range cooker is also A-rated for energy, which is especially impressive considering its 108 cubic litre capacity is one of the largest available in Europe.

The finishing **TOUCH...**

Enough to impress discerning guests, yet your Falcon experience needn't end with your range cooker. We have developed a series of complementary kitchen appliances to give your kitchen that finishing touch. Ranging from colour co-ordinating extraction hoods to premium american-style refrigeration, not to mention our range of wine storage units, Falcon appliances can create the ideal environment of revered chefs worldwide.

The SxS

Bold yet beautiful, the new Falcon SxS fridge freezer oozes style and stores plenty! Available in sleek black, classic cream or contemporary stainless steel, this popular side-by-side design layout features a digital touch-control water/ice dispenser, holiday mode (enabling a functional freezer without the refrigerator), door open alarm and retractable fridge shelving for tall storage. See page 30.

The Wine Storage Collection

Love your wine with the help of Falcon's wine storage. Offering units in either black or stainless steel, and in two widths, our collection of wine storage units are suited well to those budding wine connoisseurs and others looking to free up fridge space alike. See page 32.

Hoods & Splashback

To distinguish your cooking area as well as protect from food splashes and odours, our selection of hoods and splashbacks are designed specifically to complement our range cooker portfolio. Whether you are looking to achieve a chic country feel or recreate the professional kitchen at home, our hood and splashback collection can enhance your chosen style. See page 34.

High performance HOODS

A great feature within the kitchen setting, and a useful one at that! Falcon's range of cooker hoods fit seamlessly into the Falcon product portfolio and can cope effortlessly with the powerful heat a Falcon range cooker can generate, removing grease, steam and odours simultaneously. Our Super Extract and Contemporary ranges are available in a spectrum of colours to complement your Falcon range cooker. Choose the XT hood for ultimate impact, or the superflat and built-in options for a more discreet accompaniment to your range.

Love your WINE ...

Benefitting from a Sentry™ System to maintain optimal preservation conditions and a Vibration Neutralisation System to allow your wine to mature properly without the disruption of sediments from damaging vibrations, these stylish cabinets include the latest in wine storage technology.

Sentry™ System

The exclusive Sentry System is an intelligent refrigeration monitor, which operates to actively maintain optimal preservation conditions for your wine. The Sentry™ System uses intuitive controls to predict wine temperature, and continuously adjusts the cooling rate to create a stable environment for your collection.

Vibration Neutralisation System

A vibration-free environment allows wines to mature properly without the disruption of sediments. The Falcon wine storage units contain the revolutionary vibration neutralisation system, which will protect your wine from damaging vibrations without sacrificing cabinet capacity. The compressor is isolated from the wine storage cavity, virtually eliminating the transfer of vibration.

Sentry™ System

The Falcon SxS REFRIGERATION

A bold statement with the latest in cooling technology, the feature-rich SxS has a generous 552 litre net capacity housed within an impressive A++ unit. With filtered water and ice at the push of a button, and flexible storage solutions throughout, this is one appliance a Falcon kitchen should not be without!

Key features...

- A++ rated for energy efficiency
- Sleek look external door dispenser for water and ice
- Digital temperature controls
- Holiday mode (switch off fridge with freezer remaining fully functional)
- Adjustable Spill-proof glass shelving
- Fridge includes three humidity controlled crispener drawers
- Super cool – capturing freshness of groceries
- Super freeze – preserves nutritional value
- Ice cream shelf in freezer (at ready to eat temperature)
- Stainless Steel top cover and plinth
- Contemporary full-length LED strip lighting
- Tilting freezer door baskets

The Falcon WINE STORAGE

The perfect solution for wine enthusiasts, Falcon's family of wine storage units comprises a 54 bottle unit, a slimline 24 bottle unit for smaller kitchens (or wine collections) and an enhanced Dual Zone unit to store at different temperatures to suit.

Key features...

- Attractive under counter storage facility
- Large, double glazed UV filter picture window allows view of bottles
- Vibration Neutralisation System offers triple layer protection
- Telescopic shelves are fully extendable
- Racks have maple fronts
- A self close hinge ensures no bounce back once the door is within 20cm of the cabinet
- Maintains a consistent temperature between 4.4°C and 18.3°C
- Dual Zone features two separately controlled cavities to store both red and white wines

The Falcon WARRANTY

RANGE COOKERS, HOODS & SPLASHBACKS

Falcon range cookers have a 3 year warranty. The 3 year warranty covers any mechanical breakdown and cosmetic deterioration associated with a manufacturing defect.

EXCEPTIONS

Items that are not included under the 3 year warranty include griddles, wok rings, grill pans, trivets, filters, light bulbs and other consumable accessories. Any damage caused other than through normal use. Breakdowns associated with cooking spillages. Cosmetic deterioration deemed to be normal wear and tear. Costs will be incurred if a service call is arranged and no fault is found.

SxS REFRIGERATION

The Falcon SxS fridge freezer comes with a 2 year parts and labour warranty.

WINE STORAGE

The Falcon wine storage units have a 1 year parts and labour warranty, and an additional 2 years parts warranty.

TERMS & CONDITIONS

The 3 year warranty only applies to normal domestic use. The warranty covers any mechanical breakdown and cosmetic deterioration associated with a manufacturing defect. Proof and date of purchase will need to be established to receive a service visit.

Falcon continuously seeks improvements in specification, design and production of products and thus, alterations take place periodically. Whilst every effort is made to produce up-to-date literature, this brochure should not be regarded as an infallible guide

to current specification or as an installation guide, nor does it constitute an offer for the sale of any particular appliance. Before fitting any appliance please refer to the installation guide, available to download at www.falconappliances.co.uk

INTERNATIONALLY RECOGNISED STANDARDS

Falcon's reputation for design, build quality, and professional standards have been strengthened by the achievement of two internationally recognised standards, BS EN ISO 9001:2000 Quality Management Systems and BS EN 14001:2004 Environmental Management Systems. Both are independently audited for Quality Assurance to demonstrate how we design, manufacture and distribute our products against best practice.
