Laundry Range 2013

Miele
IMMER BESSER

Welcome to Miele

Miele was founded in Germany in 1899 by Carl Miele and Reinhard Zinkann and has always been a family-owned, family-run company.

Since the beginning, the Miele motto has been “Immer Besser”, or “Forever Better”, and it's thanks to this philosophy that the brand is identified with supreme product quality worldwide – leading the market for over a hundred years.

Quality guaranteed

Tested for 20 years' average use

To ensure that Miele appliances stand the test of time and give unbeatable performance for up to 20 years, we really put them through their paces in our test laboratories before production commences.

We offer the following free guarantees, which include parts and labour, on our washing machines:

- ★ 10 year guarantee on drum, outer tub, axle and bearings
- ★ 10 year guarantee on brushless motor*
- ★ Lifetime guarantee on door hinge, anti-corrosion and yellowing
- ★ Anti-flooding guarantee on all WPS washing machines.

We run the Cottons 90°C programme continuously for over 10,000 hours – that's equivalent to five washes a week for 20 years, based on a household of four people.

We test the hinge and door lock by opening and closing the door 60,000 times, 30,000 times of which are at extremely high force. That's equivalent to opening and closing the door once a day for 164 years.

We run the spin cycle continuously for 600 hours with a 1.3 kg imbalanced load, to ensure that our washing machines spin quietly and steadily. That replicates spinning a bath mat non-stop for 25 days.

* 10 year guarantee on the following models: W5877 (page 6), W5872 (page 7) and W5000 (page 16).

We offer the following free guarantees, which include parts and labour, on our tumble dryers:

- ★ 10 year guarantee on stainless steel drum and lifters
- ★ 10 year guarantee on motor
- ★ Lifetime guarantee on door hinge, anti-corrosion and yellowing.

We run the Cottons Normal programme continuously for over 7,500 hours – that's equivalent to five drying cycles a week for 20 years, based on a household of four people.

The control panels of washing machines and tumble dryers are subjected to 50,000 switch tests to check that the buttons will function as well in 20 years as they did when the machine was new.

Our laundry range

For over a hundred years, Miele has led the way in laundry technology.

With the latest generation of freestanding and integrated washing machines, tumble dryers and washer dryers, Miele combines its legendary quality with an elegant design to achieve an exceptional laundry care system.

Miele washing machines and tumble dryers are designed to complement each other, both in programmes offered and design.

The Miele difference

Miele's Honeycomb Drum

The Miele honeycomb drum was first developed in 2001 to provide total garment care. The inner drum is slightly sculptured into a honeycomb design creating a thin film of water or air, which gently cushions the laundry away from the drum, providing optimum care of your most precious items.

Specialist Programmes

Miele machines include all the standard programmes you would expect from a laundry appliance, such as cottons, minimum iron, delicates and express. To provide you with the perfect washing result every time, we have also developed a wide range of specific programmes for particular garment types, such as denim, sportswear, pillows and even toys. As the list includes over 50 different programmes, please visit www.miele.co.uk/programmes for more information.

Waterproof and Water Control System

In the event of a water leak, the waterproof system will switch off the supply and close down the machine in seconds. It takes only a litre of water to activate the system. The water control system incorporates a float switch to detect leaks, and a time-controlled safety check, which automatically closes off the water inlet.

Eco Feedback

Eco Feedback accurately calculates duration, energy and water consumption in every single programme, enabling you to have complete control over the valuable resources you are using.

Extra Quiet

This option allows you to reduce noise levels when using your washing machine during quiet periods. It takes advantage of a special wash rhythm and activates the rinse hold option to prevent the washing machine spinning when it could disturb you.

Perfume

A world first from Miele – the perfume option on our tumble dryers allows you to add a fragrance to your laundry that lasts up to four weeks. There are three fragrances to choose from: Aqua, Nature and Cocoon.

PerfectDry

Our PerfectDry system monitors the residual moisture in the load as well as the conductivity level of the water, and adjusts the drying time accordingly.

Gentle Smoothing

The tumble dryer Gentle Smoothing programme takes advantage of the honeycomb drum and a special drum rhythm to reduce ironing time by up to 30%.

SteamCare

This function will reduce the need for ironing by up to 50%. The water saving system, heated steam unit and unique temperature sensor can produce constant steam, bursts of steam or a combination to suit any fabric.

Stains

This extra option offers effective stain removal. There are 22 stain types to choose from, of which up to three can be selected with most wash programmes.

Please note features will vary depending on model

Edition 111

T8860 WP Heat Pump

8kg

Energy Rating: A
Dimensions*: 850 x 595 x 596mm
Key Features: Honeycomb Drum, PerfectDry, Gentle Smoothing, Time Left, Delay Start, Express, Proofing

Heat pump tumble dryers

Miele's A-rated heat pump tumble dryers are the perfect choice if you are looking for an efficient and environmentally friendly dryer with reduced energy consumption.

Unlike traditional dryers, which take air from the room, heat pump technology uses a closed air circuit that efficiently recycles air in the dryer. By doing so, the machine conserves heat in the dryer system so less energy is used to heat the air passing through the drum.

This helps save you money by using up to **46% less energy** than conventional Miele dryers using the cottons programme.

Model shown: **T7950 WP** (page 14)

Other heat pump tumble dryers can be found:

T8860 WP (page 7)

T8866 WP Flacon (Perfume) (page 11)

T8007 WP Supertronic (Perfume) (page 15).

Dryers bursting with environmental friendliness

Perfume tumble dryers

A world first from Miele.

With your Miele tumble dryer, you can now enjoy the superb convenience of a long-lasting and fresh fragrance.

The unique Miele fragrance flacons are easy to insert into the fluff filter. A pleasant fragrance is distributed automatically onto your laundry during the drying cycle. Each flacon will provide approximately 50 drying cycles and the strength of the fragrance can be determined by you. The beautiful scent will stay in your laundry for up to four weeks.

In partnership with Mane, a fragrance house in the south of France, we have developed three fragrance options:

Aqua – invokes the freshness of a sea breeze

Nature – the bouquet of early spring

Cocoon – a harmonic and tender fragrance

Fragrance flacons are available to purchase at www.miele.co.uk/store or from your local retailer.

Our perfume tumble dryers can be found:

T8866 WP Flacon (Perfume) (page 11)

T8007 WP Supertronic (page 15).

This is a semi-integrated appliance and does not come supplied with a door

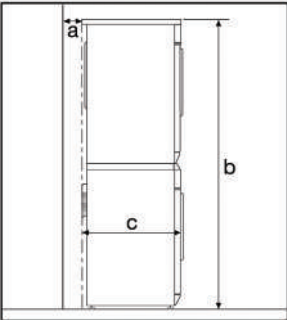

Laundry stacking kits

Where space is at a premium, a Miele tumble dryer can be fitted on top of the corresponding washing machine by using the appropriate WTV stacking kit (available to order). The result is that two appliances can be accommodated on a footprint of less than half a square metre.

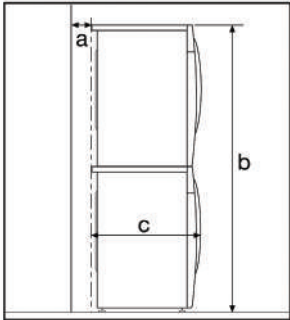

The Classic range of washing machines and tumble dryers can be fitted under a continuous worktop using the appropriate UBS – W/T building-under kit (available to order).
