glossary

Conventional gas oven

A conventional gas oven works on the principle that heat rises. It is hotter at the top than at the bottom – ideal for cooking different dishes simultaneously.

Electric conventional oven

A conventional electric oven works on the principle that heat rises. It is hotter at the top than at the bottom – ideal for cooking different dishes simultaneously.

Fan defrost

The oven fan assists defrosting by circulating air around the food ideal for delicate frozen foods such as cream gateaux and cheesecakes.

Conventional grill

The conventional grill cooks by using heat from above the food and is ideal for a range of dishes from toast to steak.

Dual grill

This feature allows you to use the whole of the grill or just part of it for grilling smaller quantities economically.

Fan grilling

The fan circulates heat from the oven grill around the food simultaneously browning and sealing the juices in. Economical rotisserie or spit effect.

Variable grill

Grilling temperature can be altered by selecting a high or low setting.

Bottom heat only

This setting allows you to cook the bottom of pizza, flan or pastries without drying out the topping.

Top heat only

Ideal for browning foods such as rice pudding or cauliflower cheese as the heat is not as fierce as a grill.

Oven light

A light in the oven for better visibility.

Base fan

Ideal for dishes that require bottom heat, such as pizzas.

Fan oven

The heating element surrounds a fan which distributes hot air around the oven. The result is a more even temperature throughout the oven and much faster cooking - ideal for batch baking.

Frost free

Gone are the days of having to defrost your freezer, no ice build up means there's plenty of room for your ice lollies.

Flame safety device

For added safety, this device is designed to detect if the flame goes out on your hob and will cut off the gas supply immediately.

Made in Britain

This icon denotes all products that are Made in Britain.

A energy rating

Relates to the efficiency of the specific appliance.

A+ energy rating

A+ energy is the most efficient energy rating.

AA energy rating

AA energy rating relates to both the top and main cavity of a double oven.

Open door grilling

Leaving the door open whilst grilling means the air inside the grill circulates, therefore grills rather than bakes.

Main oven

The larger cavity in a double oven.

Top oven

The smaller cavity in a double oven.

Double oven

An oven with two cavities. The top oven includes a grill.

Ceramic hob

The electric element is held in place under the ceramic glass. Ceramic hobs are easy to keep clean. Not all pans are suitable for ceramic hobs.

Red spot elements

Sealed electric hob elements that heat up quicker than standard elements.

Dual fuel

The perfect combination of a gas hob with an electric oven and grill that distributes an even temperature.

Induction

Induction technology works by heating the pan rather than the hob.

welcome

There's nowhere quite like your kitchen. It's where you get the family together, it's where you catch up with friends, it's the place where everyone congregates.

Your kitchen is filled with good times and fond memories and that's the way it should be, so we design beautiful, simple and intelligent appliances that let you get on with living.

built-in appliances

With built-in style and built-in intelligence, our collection has been carefully put together with a whole host of thoughtful features. You'll find ovens that not only cook your food to perfection but are decked out with defrost settings, minute minders and A-energy efficiency. And we understand that hobs can cause all sorts of worries so we've included child safety locks, durable finishes and overheat detectors to give you extra peace of mind.

colours

Liven up your kitchen with our eye-catching new colours collection of built-in ovens.

Available in a range of sizes and metallic red, green and purple colour options,
no matter what you're cooking, your kitchen's never been more stylish.

MADE IN
BRITAIN

We are excited to be part of the only major kitchen appliance
company manufacturing right here in the UK and we're firmly committed
to keeping it that way.

Why? We're proud to say that our UK-based manufacturing enables
us to sustain over 1,000 local jobs using the skills and experience of local
craftsman. And by overseeing our manufacturing from design right through to
packing, we have peace of mind that every product that leaves our premises is
ideally suited to the UK consumer and built to our exacting standards.

Our policy is one of constant development and improvement. Whilst this brochure is accurate at the time of printing, you are advised to check these specifications with the product. It is intended to help with your purchasing decision. It is not intended to replace the installation manual which provides more detailed information and should not be disregarded if specifications and/or appearances are changed in the interest of continuous improvement. All appliances featured in this brochure are CE marked as complying with the relevant appliance directives, produced under surveillance to BS EN ISO9000 series. Appliances can become very hot with use and retain their heat for a long period of time after use. Children should be supervised at all times and should not be allowed to touch the hot surfaces or be in the vicinity when in use or until the appliance has cooled after use. All technical data are taken under laboratory conditions and may vary in use. Ratings specified are quoted at 230V, products are approved for use on a 220-240V ~ 50Hz supply. The statutory rights of the consumer are not affected.
