Subject to availability. Please check with your local dealer for accessories available in your region. The overview represents an excerpt of the most important accessories. All other accessories of the appliance and further information are available at home.liebherr.com.

¹ To achieve the indicated energy consumption level, the wall spacers provided with the appliance must be used. These increase the appliance depth by approximately 1.5 cm. If the wall spacers are not used, the appliance will remain fully functional, but will have a slightly higher energy consumption level.
² In accordance with Regulation EU 2019/2016 we indicate the total volume to the nearest integer (rounded off) and the volume of the frozen compartments and refrigeration compartments to one place after the decimal point.

Features

Water & Ice centre

Simply refreshing: The Water & Ice centre provides you with fresh, cold water at any time – along with beautifully shaped, clear ice cubes and crushed ice. This means, you always have more than enough ice to serve ice-cold drinks, even at spontaneous parties. Convenient extra: The water dispenser allows you to adjust the water amount to fit your desired container

PowerCooling system

Do you want to be sure that the cold is distributed as evenly as possible in your refrigerator? If so, the PowerCooling system is what you need. The fan – as powerful as it is quiet – distributes the cold air efficiently throughout the entire refrigeration compartment.

BioFresh Professional

The BioFresh Professional safe gives food an additional boost of freshness for a long shelf life – wow effect included: Thanks to HydroBreeze a cold mist covers fruit and vegetables like a protective balm. In combination with a temperature just above 0 °C and high humidity, unpackaged fruits and vegetables feel right at home.

BioFresh with HydroBreeze

Do you want to cool fruit and vegetables like professionals? You'll be inspired by HydroBreeze. The cold mist combined with a temperature in the safe of just over 0 °C gives food that extra boost for longer shelf life. And it creates a genuine visual wow effect. HydroBreeze is activated every 90 minutes for 4 seconds and for 8 seconds when the door is opened.

BioFresh

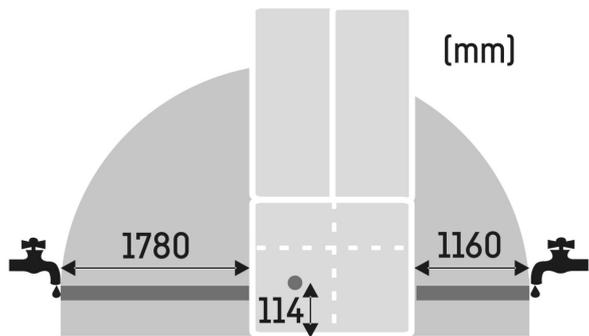

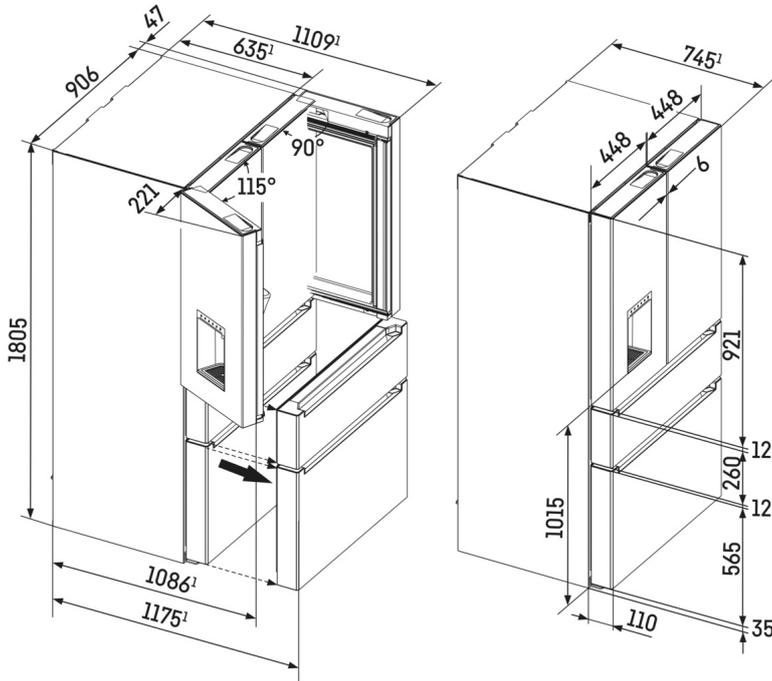

Enjoy long-lasting freshness and flexible storage: The BioFresh safes maintain an ideal climate just above 0 °C. The key feature: For fruits and vegetables, close the sealed lid to increase humidity and prolong freshness. Meat and dairy products, on the other hand, store perfectly with the lid open and lower humidity levels.

VarioTempZone

Experience maximum flexibility when storing your food: You can set the VarioTempZone to the exact degree from -18 to -10 °C and from -2 to +5 °C. This means you can enjoy an extra cooling zone at parties, for example for drinks. And if there is anything left over from the buffet? Then you still have enough space to freeze – so you don't have to throw anything away.

Technical drawing

Products and their details are staged for advertising purposes. Whilst every effort is made to ensure all specifications and information in this flyer are accurate, Liebherr reserves the right to make changes without notification. Where actual appliance measurements, specifications, and ratings are crucial, we recommend that the actual appliance installation instructions that accompany each appliance be checked. (08.08.2025)
