Our Stainless Steel Features

All Rangemaster inset stainless steel sinks are manufactured with a new Micro-Sheen™ finish featuring a hard wearing etched Rangemaster logo, and are framed within a subtle ground-edge trim to stand proud in your kitchen. This exquisite finish is complemented by the practicality of automatically applied sealant and pre-fitted clips for ease when installing.

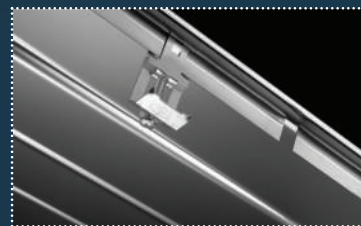

Subtle Ground Edge Finish

Each stainless steel inset fitted sink is finished with a subtle ground edge trim to beautifully frame your sink.

Micro-Sheen™ Finish

All stainless steel sinks have an enhanced soft brushed finish to the bowl & drainer.

Fitted Clips & Seals

Rangemaster stainless steel inset sinks have fitted clips and seals reducing installation time and ensure a perfect, water tight contact with the work surface.

Sink & Tap Warranty

As the largest sink manufacturer in the UK and a renowned name within kitchen appliances, Rangemaster is confident that all its products are high quality and built to last, however we recognise the importance for all our customers to have that extra peace of mind, offering parts warranties on all our sink and tap products.

Our Commitment to the Environment

It is testament to our reliability, consistency and commitment to the environment that Rangemaster is the proud recipient of double ISO accreditation. BS EN ISO 9001 certifies that Rangemaster products are designed and manufactured to an internationally recognised quality management system, while BS EN ISO 14001 acknowledges our commitment to continually improving environmental performance by adopting an approved environmental management system.

Stainless Steel Sinks

Designed to blend effortlessly into the heart of the modern family kitchen, a closer inspection of a Rangemaster stainless steel sink also reveals a real eye for design. Stain resistant, hard wearing and easy to clean, of course. Yet also with a stylish, seam-free appearance and inner strength, resulting from advanced manufacturing techniques.

Manhattan

Available as single, 1.5 & double bowl

The Manhattan combines fantastic good looks with universal appeal. Designed to perfectly complement any kitchen scheme, this stainless steel sink is slightly larger than our other inset sinks. It is immensely practical and hard-working, with a recessed drainer preventing water spillage and low profile edges providing a flush, hygienic appearance.

Keyhole

Available as single & 1.5 bowl

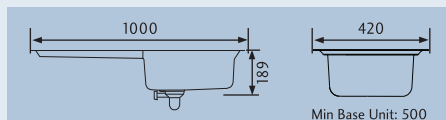

Modern, innovative and beautifully understated, the Keyhole is a truly unique concept in sink design – an example of form and function in perfect harmony. Its large, round bowl is ideal for rinsing large pans and woks, while a deep, recessed drainer provides useful additional space for food preparation. The recess also ensures no water spillage when you're draining larger items.

Atlantic Undermounts

For a more discreet presence, Rangemaster offers a vast range of undermount bowls, comprising an eclectic mix of single, 1.5 and double bowl variants. Available in three radii options the range covers curvaceous bowls and distinguished geometric effect corners to complement the tone of your kitchen.

Atlantic Kube 10mm corner radius

With a dramatic 10mm radii defining the corners to this bowl type, the Kube undermount creates a geometric effect which will sit perfectly within streamlined cabinetry. Featuring a modern square waste and overflow, this range is available in a mix of single, 1.5 and double bowl configurations.

Igneous & Granite Sinks

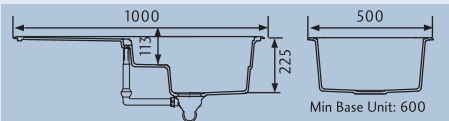

A Rangemaster sink will always be borne of a designer's expertise. Our granite range also has its roots in material innovation. Technically advanced polymers, such as Neostone and Metallix, are not only durable, scratch and impact-resistant, but are also easily wiped clean and heat resistant to 230°C, coping effortlessly with searing pans, hot liquids and practically all household chemicals.

Igneous, an impenetrable material has been used to create three designs in three popular colours. This impervious solution has been designed to withstand the toughest kitchen conditions.

MAGMA MAG1051/

- Specification:**
- Overall Size: 1000 x 500
 - Main Bowl Size: 483 x 423

Igneous Sink Features

Constructed from a patented formula of 80% quartz – the toughest element of granite – and high-grade acrylic, our new Igneous sink collection is literally rock solid. Impervious to knocks and scratches, it's UV stable for a fade-free finish and has high-intensity colour running through its very core. Cleaning is a dream thanks to Igneous' natural antibacterial surface that repels microbes and stains. There are three distinctive designs to choose from, Magma, Amethyst and Paragon, each presented in a trio of style-led shades.

Range of accessories

Modern complementary accessories, including a bamboo chopping board are available to provide that finishing touch to your kitchen sink.

Antibac

The integrated Antibac, is a hygiene protection system that reduces bacterial growth by up to 95%.

Colours

Available in three attractive colours.

ASH

CRYSTAL
WHITE

STONE

Easy to clean

An ultra fine structure creates a smooth surface, this means that dirt particles have nowhere to hide, making it easy to clean and more stain resistant.

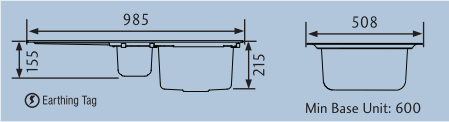

Extremely tough & scratch proof

Made from up to 80% quartz, thus creating a durable product that will stand the test of time.

Lunar

Available as 1.5 bowl

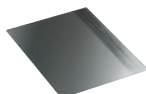

Enjoy the softly curved features of the Lunar sink, which boasts a spacious 1.5 bowls, the Lunar is made from a high quality synthetic material that's incredibly robust. Its minimalist draining area is precisely angled to carry away water with ease, while its curvaceous bowls are easier to clean than angular alternatives as there are no tight corners to harbour food debris.

Easy to install using push-fit connectors, MySpa consists of a simple 'on-off' diverter switch which can be located in place of your sink's tap-hole stopper or in the worksurface. When the diverter is turned to 'on', the mains water will be redirected through a specialist filter cartridge located neatly under the sink, which removes all additives such as chlorine to create refreshing, clear water direct from your tap. Turn it back to 'off' and the water will return to the unfiltered mains supply for washing dishes etc.

RANGEMASTER
myspa
TMYPACM/ Chrome

Spa Filter Taps & Myspa

- Inexpensive to buy and maintain.
- Filter cartridges are easy to replace.
- Offers tasty, eco-friendly and inexpensive drinking water quite literally 'on-tap'.

Reducing the impurities found in regular tap water, Rangemaster's filter tap co-ordinates with a water filter under the sink for pure tasting water. Simply pull the coldlever forward for mains water and back for filtered water.

Waste Disposal Units

Rangemaster's range of waste disposers are clean, hygienic and easy to use. All units have a lifetime corrosion guarantee and contain Bio Shield, where disposers are treated with an antimicrobial agent moulded into the casing providing protection against odour causing bacterial growth. Available in four different sizes each model is easy and fast to install and can be fitted with only a standard mains connection.

High Efficiency Permanent Magnet Motor

A permanent magnetic (PM) motor has a high speed (2600 r.p.m) and torque is attained eliminating most potential jams. Combine this with the design of the grinding chamber and faster grinding times are attained, using less electricity and water.

Lightweight Compact Design

PM motors are more compact and lighter (even though more powerful) than units that use induction motors, allowing more space under the kitchen sink.

Handles all types of waste

Most food stuffs can be placed into the disposer. Rangemaster waste disposers can take the following and more: tea bags, small bones, fish heads, fish bones, egg

shells, corn cobs, fruit pips, vegetable scraps, grapefruit halves, melon rinds and nut shells to name but a few.

Removable splashguards

Easily removable splashguard keeps ground food inside the unit. Being removable means cleaning is easy, reducing odours.

Plumb-easy mounting system

The plumb-easy mounting system means no special tools are required, making it extremely easy to install.

High quality components

Corrosion can cause leaks and jams, all our models have stainless steel grinding chambers (turntable, swivel impellers and grind ring). For further peace of mind we offer a lifetime guarantee against corrosion.

Rangemaster Quality

Our sink and tap collection is renowned for its durable build and high quality. We're proud to say that the majority of our sinks are made in the UK at our factory in Long Eaton. All of our sinks have a stylish appearance and inner strength resulting from advanced manufacturing techniques. Thanks to our exceptional standards we can offer a 5 year warranty on all of our taps and up to 25 years on many of our sinks.

Sink Accessories

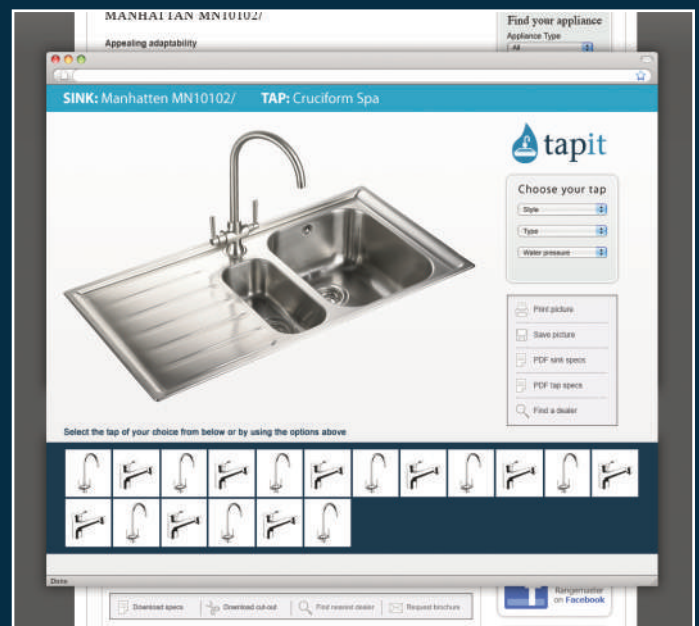

To further your level of personal choice, we have developed an extensive collection of accessories to complement your sink and surround. From draining baskets to food preparation boards, accessories can be bought online or from your local Rangemaster sink stockist.

www.rangemastersinks.co.uk

Tap-it is an online tool from Rangemaster that enables you to choose different combinations of sinks and taps and visualise exactly how they would look when placed together. Tap-it allows you to 'mix and match' products from the Rangemaster sink and tap collection at the click of a button, until you find the perfect match for your kitchen.

Rangemaster is Britain's best loved range cooker brand. We made the world's first range cooker in 1830 on the very same site in Royal Leamington Spa where we continue to design and manufacture all our products. Our range cookers are at the heart of more homes than any other, helping to create memorable family moments. As Britain's No.1 cooker manufacturer, we're a pivotal part of everyday life. Rangemaster cookers are really the essential ingredient to a perfect kitchen.

Registered Office: Juno Drive, Leamington Spa, Warwickshire, CV31 3RG

Rangemaster continuously seeks improvements in specification, design and production of products and thus, alterations take place periodically. Whilst every effort is made to produce up-to-date literature, this brochure should not be regarded as an infallible guide to current specification, nor does it constitute an offer for the sale of any particular product.
