Freestanding appliances 2015 Spring/Summer collection

siemens-home.co.uk | siemens-home.com/ie

Siemens. The future moving in.

The future moving in.

Introducing our freestanding range of sensor-controlled appliances with iSensoric technology. Fully coordinated, they are good looking on their own and fabulous together. Siemens appliances combine innovative and intelligent technology with energy efficiency and sleek, stylish design.

In this catalogue, discover iSensoric technology including our first precision dosing washing machine, which produces outstanding wash results whilst saving litres of water a year, and our most energy efficient tumble dryer. We also present our latest range of award-winning dishwashers featuring the world's first Zeolith® drying system; a technological innovation that sets new standards for performance and energy efficiency. Take a look at our stunning fridge freezers, fridges and outstanding freezers that never have to be defrosted, all working to make your life easier, whilst working together to create a spectacular kitchen for your home. Stunning designs that your friends will envy, clean lines that coordinate with the rest of your living space and high quality materials come as standard with all Siemens appliances. Offering you the perfect balance between modern design and innovative technology, our appliances sit seamlessly together to help you lead a life less ordinary.

Welcome home.

In the spotlight, our elite appliances.

Giving you time saving solutions that also help to save the environment.

Perfectly balanced with style and concept, Siemens top of the range iQ700 appliances have many outstanding features that are going to benefit both the environment and your lifestyle. Stunning designs that your friends will envy, clean lines that are going to coordinate with the rest of your living space and high quality materials. All of Siemens appliances are extremely energy efficient and many boast A+++ energy efficiency ratings, as a result of our ground-breaking technologies.

Free 5-Year Guarantee on selected models

For complete peace of mind, all Siemens appliances come with a free 2-year guarantee as standard. A free 5-year guarantee is available on selected freestanding models, where indicated. The extended guarantee covers parts, labour and call-out charges.

Featuring innovative technology for super clean dishes, Siemens SN278I01TG dishwasher uses the minimum amount of water and energy per wash. Zeolith[®], a form of naturally occurring mineral has the astonishing ability to absorb moisture and convert it into heat. This means the dishwasher is able to produce enough heat for the drying cycle naturally and no additional energy is required. Giving you a time saving solution, that helps to save the environment.

The Siemens WM14Y892GB i-Dos washing machine is certainly one to take note of. With its intelligent dosing system the machine automatically determines the exact amount of liquid detergent needed for each laundry cycle, based on the weight of the load and what programme is used. Your clothes receive a perfect wash time after time. Combine this with our WT48Y890GB energy efficient tumble dryer, with air condensation technology that uses less water to dry your clothes, and all you need think about is the ironing.

Research shows the average household with children throws away approximately £50 worth of food and drink a month*. With the food preservation technologies in many of our fridge freezers your can store fresh food for up to three times longer, meaning there will be fewer trips to the supermarket and you can enjoy your favourite foods for longer.

* lovefoodhatewaste.com

Unique Zeolith[®] minerals stored at the base of our dishwasher, SN278I01TG.

Intelligent dosing with our i-Dos washing machine, WM14Y892GB.

The perfect environment for fresh food

Washing machines

Smarter thinking, smarter clothes.

Siemens presents: iSensoric.

Sensor-controlled technology meets the demands of a life less ordinary.

Discover how iSensoric features like i-Dos and autoStain work to save you time and energy while giving you the freedom to forget about laundry and get on with your day.

iSensoric is a ground-breaking innovation in laundry care. It stands for automatically measuring, detecting, calculating and controlling every step of the washing process.

> It intuitively creates a bespoke wash programme to deal with the demands of a challenging and active lifestyle, delivering perfect results with every load.

Automatic washing finally means you can get on with the things that matter most to you. For a life less ordinary. All Siemens washing machines have intelligent features that derive from the interaction of specific sensors. These sensors are present in different combinations throughout the range, but all with the same goal of achieving perfect wash results no matter the size or soiling of the load.

The sensor-controlled technology for perfect laundry care.

The power of interacting sensors.

The unique quality that distinguishes the iSensoric technology is the connection of all the sensors.

1 i-Dos

Automatic dosage of the detergent. The i-Dos system is the combination of all the sensors. It automatically determines the exact amount of liquid detergent needed for each laundry cycle, based on weight of the load and what programme is used. The built in drawer conveniently holds enough liquid detergent for around 20 washes, meaning you don't have to measure and fill the container for every wash. Plus as the correct amount of detergent is used every time, clothes will receive the perfect wash.

2 Textile Guard

Working with Nikwax, Textile Guard applies a waterproof treatment to breathable fabrics, prolonging the life of high quality functional clothing like winter jackets, fleeces and ski suits. Simply add the Nikwax treatment to your detergent drawer and select the Textile Guard option.

3 autoStain

autoStain removes the 16 most common stains. Each stain is different, whether it comes to tomatoes, grass or red wine! The autoStain system knows exactly how to handle these stains. The temperature sensor selects the right temperature for the molecular properties of the stain. The flow sensor and load sensor plus choose the right amount of water in order to remove the stain.

4 Outdoor Wear

Since outdoor wear is mostly made of synthetic fibre, the dirt stays on the surface and needs to be rinsed with lots of water. With iSensoric, the exact amount of water in relation to the load volume is monitored by the flow sensor and the load sensor plus, to only ever use the optimum amount. As most outdoor wear has welded seams, the temperature sensor also controls the heat level to avoid damage to the seam.

5 varioPerfect

With varioPerfect you can determine the washing process depending on what is important to you; saving time or energy, without compromising on quality or cleanliness.

6 Auto Programmes

With Auto programmes the amount of water, energy and the amount of detergent needed is tailored to the amount of laundry in the machine. The flow sensor accurately measures how much water is needed, while the load sensor plus measures how much and what kind of laundry is put into the drum. Each wash cycle will detect the necessary requirements, using minimum consumption of water, energy and detergent, but always with a perfect washing result. Auto programmes – powered by iSensoric.

Just add laundry!

The i-Dos system automatically determines how much detergent is needed for each of your wash loads, based on the weight of the laundry and programme used.

Built-in detergent drawer holds enough detergent for around 20 washes.

Saving you time, the i-Dos washing machine allows you to simply place your clothes in the drum, select your desired programme and relax. The i-Dos system uses a combination of all the sensors to automatically determine the exact amount of liquid detergent needed for each of your laundry cycles, depending on the weight of the load and what programme is used. With the built-in drawer conveniently holding enough liquid detergent for around 20 washes, not only does this mean you don't have to measure and fill the container for every wash, but as the correct amount of liquid detergent is used every time, your clothes will receive the perfect wash whilst saving you precious time and around 11 litres in detergent per year. The result, hassle-free laundry and perfectly clean clothes!

Tough on stains, gentle on your washing.

Removing tough stains without the need for specialist products or pre-washing.

Keeping your life uncluttered, our specially designed autoStain removal system (ASR) takes the effort out of cleaning tough stains. Simply load your clothes in the machine, choose a wash programme, select one of the 16 stain treatments and let ASR do the rest. This saves you time and removes the need for specialist products or pre-washing.

It happens to the best of us, a stain on your favourite dress or best shirt is part of life. However, we have a solution that is going to save you time and effort when it comes to removing stubborn stains, autoStain system (ASR, available on models WM14Y892GB, WM16Y792GB and WM14Y792GB). So next time you need to remove last night's wine from your shirt sleeve or a lipstick smudge on your favourite dress, look no further than your Siemens washing machine.

Whether it is red wine or coffee, dirt or grass, blood or even cosmetics, our autoStain removal system (ASR), automatically optimises the wash settings to remove individual stains from your laundry. The ASR system eradicates the need to pre-wash stained clothes and the use of special detergents, tackling up to 16

Stain selection is made easy with the large TFT clearText display screen.

different types of stain. The ASR system tailors the wash according to the nature of the stain, creating the perfect balance between the mechanical drum action, water level, wash time and temperature.

Saving you time and money on buying specialist products, those unforeseen accidents need not ruin your clothes anymore.

Home Laundry

Silence is golden.

Model shown: i-Dos washing machine WM14Y892GB.

Our friction free iQDrive motor is complimented by antiVibration technology, letting you enjoy entertaining without competing with the noise of your washing machine. Noticeably quieter our washing machines and dryers are designed to fit in around your hectic lifestyle with minimum disturbance.

The iQDrive is the most economical, fastest, quietest and durable motor we have ever built, hence why it comes with 10-year motor guarantee and a 5-year parts and labour guarantee. This specially designed motor at the heart of our machines is designed to last longer; meaning you'll never be without clean laundry, as well as being extremely quiet, meaning you can enjoy a conversation without having to compete with your washing machine.

Enjoy a conversation

without having to compete with your washing machine.

iQDrive - fast, quiet and durable.

The iQDrive together with our silent antiVibration design, the circular design on the side of machine, gives you a fast, efficient laundry service that does not take centre stage.

The dynamic duo that speaks your language.

Bringing speed, technology and style together the matching i-Dos washing machine and dryer are the perfect combination for your modern home.

Large TFT clearText display for you to easily select desired programme

Install separately, side-by-side or stack them one above the other, however you choose to display our matching washing machines and dryers, they're the perfect choice for your modern living space. No longer will you want to hide them behind a cupboard door. Our eye-catching designs are just as innovative as the technology used inside.

Complementing each other with their stunning design and intuitive controls, our dynamic duo is the perfect combination for quick and easy laundry at home.

What can you do in an hour?

Add the laundry to your list. Need a shirt cleaning an hour before you're due to leave the house? Don't panic! The rapid15 programme will save the day. Designed for those of us with hectic lives this wash cycle will clean your clothes when you are in a hurry. rapid15 washes, rinses and spins laundry in just 15 minutes. Combined with the speedy 40 minute drying programme of our tumble dryers, rapid40 will have your favourite shirt ready by the evening.

With a sophisticated range of programmes to choose from you need a display that compliments the technology. Our high definition (TFT) display screens on both our washing machines and dryers present high contrast text that's easy to read from any angle. This combined with the ergonomic jog dial makes it very simple to select the perfect programme.

The new consumption indicator is displayed for each programme to show which use less or more energy and water. You can now see the efficiency of each wash and make a more informed choice when doing the laundry.

Taking the chore out of laundry.

Intelligent by name, intelligent by design; the i-Dos system automatically determines how much detergent is needed for each of your wash loads, based on the weight of the laundry and programme used.

Model shown: i-Dos washing machine WM14Y892GB.

Ever forgotten to put an item of clothing in the wash?

Have you ever started a wash only to realise you've left something out or included something you shouldn't have? The Reload function is the perfect solution for when your laundry is on the wrong side of the drum door. Simply hit the button to pause the cycle, the door will then open at the next available opportunity and you can add or remove your extra washing. Dirty clothes will rarely be missed from the wash again.

Removing the guesswork from your laundry

You no longer have to spend time wondering how much detergent to add to your laundry, as autoLoad Plus does it for you. The washing machine sensors automatically weigh the load that is being washed, suggest the correct programme and determine the perfect amount of detergent you should add to the machine. Taking the guesswork out of laundry and improving the efficiency of your machine.

Helping to keep clothes crease free

Minimising your laundry tasks the Less Ironing option included on Siemens washing machines is going to free up your time. At the touch of a button Less Ironing can be added to your selected programme, ensuring the machine gently and evenly drains the water and reduces the spin speed, both helping to keep your clothes crease free, meaning a lot less ironing.

Keeping clothes multi-functional

What used to require a trip to the dry cleaners can now be done quickly and easily at home with the help of your washing machine. Working with Nikwax, Textile Guard applies a waterproof treatment to breathable fabrics, prolonging the life of high-quality functional clothing like winter jackets, fleeces and ski suits. Simply add the Nikwax treatment to your detergent drawer and select the Textile Guard option.

Designed to work around your busy schedule.

Giving you the choice, varioPerfect allows the setting of certain washes to be changed determined on what is most important to you, time or energy. Decreasing a washing machines cycle time by up to 65%*. speedPerfect is ideal for getting through your laundry quickly without compromising on quality or cleanliness, whereas ecoPerfect lengthens the time of a cycle by reducing the machines energy output by up to 50%**.

A clean appliance is just as important as clean clothes.

A prompt to keep your appliance clean, the Drum Clean programme can automatically alert you after 20 washes to run the Drum Clean programme on either a 90° or 60° wash. To consistently achieve the best results, a washing machine needs to be maintained with a regular maintenance wash to remove any residues that could transfer to clothes. Keep your clothes and your machine, completely clean without using any specialist products. Home Laundry

*Cottons 40°C: Standard programme compared with speedPerfect option. **EU label standard cottons 60°C programme with ecoPerfect option.

Tumble dryers

Efficient drying, efficient energy consumption.

Tumble dryers that maintain energy efficiency for life.

A maintenance free machine you can count on for years to come. Unlike other dryers, our tumble dryers (WT48Y890GB, WT47W590GB, WT46W381GB) are built with an automatic selfCleaning condenser system, that uses water, collected during the drying cycle, to clean the heat exchanger three to four times during every cycle. Meaning you no longer have to remove and rinse the component after every cycle, as the machine does it for you. If the heat exchanger is not cleaned regularly to remove this build-up, a machine's energy consumption rate quickly rises and its energy rating can drop from A to B, C and lower. By automatically selfCleaning several times during a cycle our Siemens iQ700 condenser dryer maintains its A+++ energy rating for life. With the selfCleaning condenser system you get a maintenance free machine that maintains peak efficiency and lower energy bills.

Water filtering
 Self-cleaning
 Lint and fluff

21

Siemens innovation for complete laundry care.

When space is an issue – stack.

When you're short on space, a Siemens stacking kit provides the answer. It's an ergonomic solution too, because the tumble dryer is mounted at a convenient height for loading and unloading. Choose either the basic kit, or the version that includes a pull-out shelf for putting the laundry on.

Sensor drying

All Siemens tumble dryers feature sensor drying, which provides uniform drying results, and makes over-drying a thing of the past. Sensors in the drum continually monitor the residual moisture in the laundry. They detect when the load has reached the selected drying level, and move the programme to the final cool-down period. So your laundry is afforded the utmost protection, while neither energy nor your time is wasted.

The Rapid 40 drying programme

Washing laundered with the Rapid 15 wash programme is perfectly dry in only 40 minutes, thanks to optimised temperature control and a customised cool-down phase.

A lot less ironing

The less ironing option extends the anti-crease phase period at the end of the cycle to up to 120 minutes. The gentle tumbling motion of the softDry drum system leads to fewer creases in your laundry – so you can spend less time ironing.

Dry washing, dry room

88% of the humidity generated by the drying is kept within our dryers. Other dryers on the market aren't anywhere near as good at this, and so produce far higher air humidity in the room.

The new softDry drum system

The softDry drum system, the first of its kind in the world, ensures a stable drying temperature and constant airstream in the drum. The soft, wave-like paddles stir the warm air and distribute the laundry gently and efficiently. The drum surface improves airflow so the laundry glides over the drum as if floating on a cushion of air, reducing mechanical wear and tear on your fabric.

Washer dryers

A breath of fresh air.

Some things only a washer dryer can do.

Being kinder to the environment with every wash, our energy-efficient appliances use no additional water during the drying process. What does this mean for you? Cheaper utility bills. With state-of-the-art technology built into our appliances Siemens have some of the most energy efficient washer dryers on the market. The airCondensation systems in our iQ700 washer dryer uses no extra water during the drying process, making it an extremely resource efficient appliance. Using as little as 4.76 kWh of energy and the minimum water to wash and dry a full load of laundry the appliance earns itself an ultra-efficient rating of A. Working quietly, automatically and saving you money on utility bills. From dirty to perfectly clean and dry, effortlessly the WD15H520GB can wash and dry up to 4kg of laundry non-stop in a single operation. That's the equivalent of 7 pairs of trousers or 18 shirts, carefully and perfectly washed and dried. Load your wash into the drum, switch on the washer dryer and relax. When it's done remove the clean or cupboarddry laundry – nothing could be easier, more convenient, whilst also saving you space in your kitchen.

Just add laundry.

i-Dos – intelligent by name, intelligent by design.

Our premium iQ700 washing machine features iSensoric technology: i-Dos an intelligent-dosing system, which allows you to simply place your clothes in the drum, select your desired programme and relax, whilst our other machines in the range feature auto stain removal (ASR), which eradicates the need for specialist cleaners to remove stubborn stains. Together with the quiet iQDrive motor, energy efficient varioPerfect feature and large TFT clearText display our iQ700 washing machines have a lot to offer, you won't want to hide them away.

Built in drawer holds enough detergent for 20 washes.

Our most intelligent dosing system – just add laundry.

i-Dos, how does it measure-up?

i-Dos automatically determines how much detergent is needed for each wash, based on the weight of the laundry and program used. The result is hassle-free laundry with perfectly clean clothes, as well as saving around 11 litres of detergent every year.

Tough on stains

Accidents won't ruin your clothes; the autoStain removal system perfectly and precisely removes 16 tough stains, without the need for specialist products or pre-washing by hand – saving you time, energy and money. Featured on iQ700 models WM14Y892GB, WM16Y792GB and WM14Y792GB.

Dynamic duo

Our matching washing machines and dryers are the perfect choice for your modern living space. No longer will you want to hide them in the utility or behind a cupboard door. Our eye-catching designs are just as innovative as the technology used inside.

Form and function.

The iQDrive is the most economical, fastest, quietest and durable motor we have ever built.

Home Laundry

Our iQ500 models come with a 10-year motor guarantee and a 5-year parts and labour guarantee. Featuring the innovative iQDrive motor together with our silent antiVibration design and varioPerfect technology these models give you a fast, efficient laundry service with top rating energy savings.

No wear and tear. Quiet. 10 year warranty. iQDrive is at the heart of our machines.

Passing the iQ test

Having the iQDrive at the heart of your machine provides a number of benefits. The frictionless design means no wear and tear, resulting in an increased life span of your machine. No friction equates to super-quiet performance, so the kitchen won't be dominated by the sound of your laundry being cleaned. Enjoy your kitchen for what it was made for – entertaining.

What can you do in 15 minutes?

Add the laundry to your list. rapid15 washes, rinses and spins lightly soiled clothing in just 15 minutes, meaning your favourite shirt will be ready for the evening before you've finished dinner.

Laundry solutions for your lifestyle

varioPerfect provides flexibility on a daily basis. The varioSpeed option cleans clothes in a hurry, whilst ecoPerfect consumes less energy to save you money giving you total control.

Silence is golden.

Noticeably quieter our washing machines and tumble dryers are designed to fit in around your hectic lifestyle with minimum disturbance.

Built with the latest innovations our iQ500 tumble dryers provide you with clean, dry laundry, time and time again. With an antiVibration design built into the sides of the machines, noise levels are reduced so the appliance doesn't disturb you whilst the machine is working.

antiVibration panels reduce noise to ensure you can entertain.

Innovations that save time and money and guarantee satisfaction.

A lot less ironing

The amount of clothes in your ironing basket is drastically reduced with the less ironing option. This option extends the anti-crease phase at the end of the cycle and the gentle tumbling motion of the softDry drum system leads to fewer creases in your laundry – so you spend less time ironing.

Silence is golden

antiVibration uses the science of nature to reduce the decibel level of the appliance so that you can enjoy entertaining in the kitchen without competing with the tumble dryer.

Ready to iron in only 40 minutes

rapid40 drying programme; leaves clothes ready to iron in only 40 minutes thanks to the optimised temperature control and customised cool-down phase of the rapid40 programme.

Dishwashers

Extra innovations for extra shine.

Model shown: Zeolith® dishwasher SN278I01TG

Siemens presents: iSensoric.

iSensoric: sensor-controlled technology for sparkling results.

Sensors that take care, so you don't have to.

Introducing a new generation of dishwashers with iSensoric technology. Discover intelligent features such as auto programmes that save you time and energy, as well as taking care of the dishes so you can enjoy the more important things in life.

iSensoric is the groundbreaking innovation that stands for automatically measuring, detecting, calculating and controlling every step of the cleaning process. For a life less ordinary.

Every load is different, whether it's your own speciality or a dinner party to remember. Thanks to interacting sensors, all Siemens dishwashers automatically control the entire washing and drying process no matter the size of the load or how stubborn the stains.

Intelligently adjusting the water consumption, water temperature and cycle time, makes sure your dishes are always perfectly cleaned and dried, saving time and giving you the freedom to get on with your day, or night.

All Siemens dishwashers have intelligent features that derive from the interaction of specific sensors. These sensors are present in different combinations throughout the range, but all with the same goal of achieving sparkling results while saving time and energy.

The power of intelligently linked sensors.

The unique quality that distinguishes the iSensoric technology is the connection of all the sensors.

1 Auto Programmes

Brilliant results at the push of a button. As soon as one of the auto programmes is activated, the aqua sensor automatically measures the cloudiness of the water to precisely adapt the amount of water needed for optimal cleaning. In interaction with other intelligent sensors, the iSensoric control unit steers the whole washing and drying process to deliver brilliant results every time.

2 aquaStop®

For a lifetime guarantee against water damage. This safety system prevents any water damage using the intelligent network of sensors. Regardless of whether the inlet hose or the appliance is leaking, the security sensor immediately detects it and activates the aquaStop[®]. Siemens guarantees this safety with a lifelong warranty.

3 intensiveZone

For pots, pans and delicate dishes all in one wash. Activating the intensiveZone automatically increases the spray pressure in the lower basket. This way, heavily soiled pots or pans can be cleaned thoroughly, while delicate dishes in the upper basket are treated gently and safely. As part of iSensoric, the water volume sensor ensures an optimal amount of water within the dishwasher – for superior cleaning performance.

4 TFT display

Crystal-clear operation. The intuitive TFT clearText display houses the iSensoric Control Unit which processes the information given by each sensor to ensure brilliant results. With the ability to think, the real-time clock is able to display the exact time each load will be ready, the info button brings up written programme information and the Eco Forecast feature shows the energy and water consumption for each cycle. This intelligence makes each dishwasher easy to use.

Saving energy naturally.

Innovative technology for super clean dishes every time, whilst using minimal water and energy.

The Zeolith® minerals are stored at the base of the dishwasher

Energy efficiency meets cutting edge design.

Using advanced drying technologies Siemens dishwashers keep energy consumption to a minimum. Zeolith[®], a form of naturally occurring mineral has the astonishing ability to absorb moisture and convert it to heat.

What does this mean for you? The heat produced naturally by the Zeolith[®] is used for the drying cycle. No additional energy is therefore required to heat up the contents of your dishwasher for the drying process (as with a standard drying system). This results in perfect drying, with less energy usage.

The Zeolith[®] mineral is stored in the depths of the dishwasher; this regenerates itself and keeps working for the entire lifetime of the machine. Combine this with the economy 50 programme to get brilliant results with minimal energy. Using the latest sensor technology, our dishwashers don't just save water, they also save energy. All Siemens dishwashers have an energy rating of at least A+, with our iQ700 Zeolith[®] models boasting a maximum efficiency A+++ rating. Saving energy is important; not just to help reduce your utility bills, but also to be kinder to the environment.

Add an extra sparkle

Straight from dishwasher to table, Shine & Dry gives you streak-free, shining glasses. Harnessing the power of Zeolith[®] at its best, the special drying cycle also works just as well on plastics, pots and pans. Saving you time, you no longer need to give glasses an extra towel dry to smarten them up, allowing you to spend more time with your guests.

Top drawer.

Dishwasher interior design at its highest level.

Keeping the design of your dishwasher just as sleek on the inside as it is out, Siemens dishwashers house various features that will benefit you when washing your dishes. With adjustable drawers and baskets for larger pans or serving plates that indicate adjustment options at a glance with blue touchpoints, extra slats for wine glasses and crockery, a cutlery drawer and a basket that helps to disperse detergent more effectively. No matter how many guests you are planning on having for dinner, loading the dishwasher will no longer be as stressful.

rackMatic™

Ever found yourself loading and unloading the dishwasher because the last pan doesn't fit? rackMatic conveniently allows you to raise and lower the height of the top basket, even when the dishwasher is full. With the simple flick of a lever you can adjust the basket to suit your washing needs. This increased flexibility ultimately saves you time, letting you get back to more important things.

varioFlex Pro basket system

The varioFlex Pro basket system is designed to hold larger plates and allows you to create extra space for pots and pans with ease. Blue touchpoints inside the baskets indicate all the adjustment options available at a glance. It's never been as easy to adjust the slats to suit each load, making the inside of your dishwasher constantly adaptable. varioFlex Pro baskets ensure your dishwasher fits in with your lifestyle, no matter how much it may change day after day. Enjoy fewer washes and more flexibility.

Our technological innovations guarantee low water and energy consumption – without compromising on results.

10 year anti-rust warranty

Due to advanced materials and manufacturing technologies, in addition to our standard appliance warranty, we are able to provide a free of charge warranty against rustingthrough of the dishwasher's inner cavity.

emotionLight

Creating a relaxed ambiance in your living space, the emotionLight uses LED lights to reflect off your brilliantly-cleaned glasses and create a cool blue sparkle from inside your dishwasher. They never need to be changed and will last the lifetime of your dishwasher.

varioDrawer Pro

The varioDrawer Pro adds a third shelf for cutlery and removes the need for a cutlery basket, creating more space. Knives, forks and spoons are placed on their side, leaving them easier to remove when emptying the dishwasher. Convenient blue touchpoints also indicate all the adjustment options available, such as lowering the side sections to accommodate bulkier items like espresso cups and ladles. Perfect for the extra-large dinner party, you can fit more in, making the after dinner clean up quick and simple.

dosageAssist

Ensuring that your dishes receive the best possible clean every time, dosageAssist quickly and evenly dissolves your dishwasher tablets throughout the entire machine, leaving no mess for you to clean at the end of the cycle. Rather than the detergent tablet dropping to the bottom of your machine, it falls into an innovative basket at the front, allowing it to dissolve completely leaving no mess and a brilliant clean.

Siemens recommends using Finish dishwashing products

Siemens has tested and recommends using Finish dishwashing products. For the ultimate clean and shine, plus added protection against corrosion, Siemens recommends new Finish Quantum Shine & Protect.

Clean dishes before the evening is over.

Giving time saving solutions when they're needed the most.

varioSpeed Plus cleans and dries in a third of the time, with no compromise on washing or drying performance.

Ever needed your dishes cleaned quickly, forgotten to put the dishwasher on in the morning, or simply need clean plates before your guests arrive? That's why we've introduced varioSpeed Plus, the perfect time saver. varioSpeed Plus reduces the time it takes to wash and dry a full load down to a third.

Ideal when you need your cutlery and plates in a hurry, just press the varioSpeed Plus button in conjunction with your desired programme* and it will run the dishwasher significantly faster without compromising on wash quality. Used together with the Eco 50 programme, varioSpeed Plus will wash and dry a full load in just over an hour. Giving you time saving solutions when you need them the most and sparklingly clean dishes in super swift time. *Except quick wash 45°C programme.

intensiveZone

With intensiveZone, you can wash delicate glasses and burnt cooking pans in the same wash. The higher temperature and increased spray pressure in the lower basket ensures stubborn stains are removed, whilst delicate items are protected in the top basket. This means there is no need to separate washes in to different loads for two cycles, and no need to soak heavily soiled pans overnight saving time. And with iSensoric, the water volume sensor ensures an optimal amount of water within the dishwasher at all times.

No need to do separate washes with intensiveZone.

Added extras.

With cutting-edge technology, Siemens dishwashers give you more than just clean dishes. Functional and specialised programmes mean you will no longer want to select the quickest wash.

Model shown: Dishwasher with TFT clearText display. SN277W01TG.

halfLoad

Great for couples and smaller households, the halfLoad function lets you place items anywhere in the dishwasher. Ideal for smaller loads, it uses up to 20% less water and 10% less energy to produce a brilliant clean. A dishwasher uses water and energy most efficiently when run with a full load. However, halfLoad offers a resource saving option for when you can't wait until the dishwasher is full.

extraDry

Why spend time towel-drying plasticware when extraDry does it for you? extraDry is designed to make sure that plasticware comes out of the dishwasher bone dry – no more water droplets, no more hand drying, saving you time.

hydroDry

Protect your glasses from cracking with hydroDry. Heat generated during the wash cycle is used to pre-heat the rinsing water to stop glasses being put under stress. And as existing heat is used to gently warm the rinse water, it's energy-efficient too.

ecoDry

The most efficient and effortless way to dry each load, the ecoDry setting automatically opens the dishwasher door at the end of each cycle. This allows room temperature air to naturally dry the contents of the dishwasher without using any additional energy. Perfect for leaving the dishwasher to finish at night, or when you need to spend time on the more important things in life.

Wine glass holder accessory

No longer will you choose to wash your wine glasses by hand. Available as standard in all full-size freestanding dishwashers, this accessory holds and optimally cleans up to four long stemmed wine glasses safely and securely. The innovative lock mechanism ensures your glasses are stable in the basket, yet with minimal contact areas to avoid any water pooling or streaks. The result? Sparkling glasses that have been safely cleaned and dried, every time. The accessory is also available to buy from the Siemens website.

Real-time clock

For those that lead busy lives, it's important to plan and manage your time effectively. Thanks to the real-time clock display, it's now possible to set the exact time that you want your dishes to be ready.

Slimline dishwashers

Small in stature, big on features.

Space-saving.

duoPower spray arms work hard to reach every inch of the basket.

Dishwashers

The less space available, the more valuable that space becomes. This is especially true of a small kitchen, where a lot of space can be gained by using it efficiently. A 45cm slimline dishwasher can help you to do just that.

A⁺ Energy

Although the dishwashers in the 45cm slimline series may be small, they are still intelligent when it comes to powerful cleaning. Benefitting from 2 spray arms under the top basket as opposed to just one, duoPower ensures that your dishes receive the best possible clean, with 2 duoPower arms working doubly hard to reach every inch of the basket.

Resource efficiency

Using only 9.5 litres of water to wash 10 standard place settings in one cycle, our iQ500 45cm slimline dishwasher is extremely resource efficient too.

Saving energy naturally.

Utilising natural technology for unprecedented drying.

Keeping your energy consumption to a minimum, Siemens iQ700 dishwashers use Zeolith[®], a naturally occurring mineral, to create the heat needed for drying dishes. This combined with the high resolution TFT clearText colour display, varioSpeed Plus for a significantly faster wash, and the innovative, convenient varioDrawer Pro, gives you a dishwasher that is easy to use and designed to perform.

Zeolith® minerals - Naturally brilliant drying.

Energy efficiency meets cutting edge design.

Energy efficient drying

Zeolith[®] uses natural minerals that release moisture as energy. Brilliant drying, costing as little as 10p per cycle, whilst being kinder to the environment.

Add an extra shine in an instant

Experience streak-free glasses with Shine and Dry – make an impression for any occasion without the need to hand dry glasses. It perfectly dries plasticware too.

More space

varioDrawer Pro saves space as you don't need a cutlery basket. With the adjustable slats highlighted by blue touchpoints, you can adapt the drawer to fit in larger items such as espresso cups, ideal for dinner parties.

Wine glass holder accessory

Peace of mind and glistening wine glasses. Simply lock up to four long stemmed glasses into the holder to ensure your glasses are safely and optimally cleaned with no chance of water marks.

Clean and dry in a third of the time.

Ideal when you need your cutlery and plates in a hurry!

The Siemens iQ500 is a dishwasher that is going to save you time. The varioSpeed Plus option is the perfect time saver. Reducing the time it takes to wash and dry a full load to a third and not compromising on wash quality, means you'll never have to hurry to wash the dishes again.

rackMatic[™] – Flexible loading even when full.

Advanced technology designed for today's busy lifestyles.

Perfect time saver

varioSpeed Plus is the perfect time saver, reducing washing and drying times down to a third. Ensure you're never caught out if you forget to start the dishwasher on time.

Separate washes are a thing of the past

The intensiveZone option, featured on all Siemens freestanding dishwashers, means delicate items and heavily soiled pans can be washed together. Letting the dishwasher do the hard work while you spend time with your dinner party guests.

Additional flexibility you need it

Adjustable and flexible baskets in an instant. rackMatic[™] conveniently allows you to raise and lower the height of the top basket with a simple flick of a lever, even when the basket is full.

ecoDry

The ecoDry setting automatically opens the dishwasher door slightly when the cycle finishes, letting each load dry naturally.

Space and time saving.

Use every square centimetre of living space efficiently.

The less space available, the more valuable that space becomes. This is especially true of a small kitchen, where a lot of space can be gained by using it efficiently. It's also even easier to save time when using varioSpeed Plus, cutting cycle times to a third. A 45cm slimline dishwasher can help you to do just that with all the innovative technology you'd expect from a Siemens dishwasher.

extraDry - Bone dry plasticware.

Small but intelligent and powerful when it comes to cleaning.

Nowhere to hide

duoPower provides 2 powerful spraying arms that work in unison to reach every corner of the dishwasher, leaving nothing but outstanding results – every time.

Additional flexibility when you need it

Adjustable and flexible baskets in an instant. rackMatic[™] conveniently allows you to raise and lower the height of the top basket with a simple flick of a lever, even when the basket is full. And with varioFlex Plus baskets, enjoy even more space in your dishwasher. This increased flexibility ultimately saves time and takes the stress out of loading the dishwasher.

No more hand drying

extraDry was created to immaculately dry plasticware. You now can enjoy picnics and BBQs as extraDry ensures that your food containers come out of the dishwasher bone dry, so no more water droplets and extra time hand-drying the plasticware.

Made in Germany

Cooling

Super efficient, super stylish.

Model shown: Is an illustration.

Fresher food for longer with iSensoric.

Sensor-controlled intelligence for ultimate freshness.

Enjoy the flexibility that a Siemens cooling appliance with iSensoric technology can offer and discover intelligent features like freshSense and noFrost which work to keep your food at its best for longer and free you from the chore of defrosting the freezer.

iSensoric is the groundbreaking innovation that stands for automatically detecting, calculating and controlling the whole cooling process. For a life less ordinary.

The intelligent interaction between the iSensoric sensors enables a full range of freshness-features that keeps food at its optimum temperature and keeps up with your lifestyle.

Think of the time you would save with a freezer that never needs to be defrosted and imagine being able to trust that your fridge is keeping your food as fresh as the day you bought it for even more flexibility when deciding on what to eat. All Siemens cooling appliances have intelligent features that derive from the interaction of up to eight specific sensors. These sensors are present in different combinations throughout the range, but all with the same goal of achieving fresher food for longer while saving time and energy.

Sensor-controlled cooling.

The unique quality that distinguishes the iSensoric technology is the connection of all the sensors.

1 freshSense

Fresh food, guaranteed for longer. With conventional fridges, varying surrounding temperatures and the continuous opening of the refrigerator door lead to temperature changes inside the appliance. To ensure this does not affect your food, iSensoric immediately reacts. The freshSense sensors activate the moment a change in temperature is registered, for example when products are stored away, and compensates for this change in an instant. Therefore the temperature always remains within the optimum range and your food stays fresh and delicious for longer.

2 noFrost technology

Defrosting the freezer is now done automatically. Siemens fridge freezers and freezers with iSensoric are equipped with intelligent sensor-controlled technology to save the hassle of defrosting the freezer. An air-circulation system guides the humidity to the outside of the refrigerator into an external evaporation tray, and sensors measure the degree of humidity and any frost production – ensuring the appliance is periodically defrosted without the need to turn off the fridge freezer or empty it out. Also, ice no longer forms on the inside of the refrigerator, and the appliance's energy consumption remains consistently low.

3 touchControl

Total control at your fingertips. Thanks to the highly sensitive sensors, even the slightest touch of the touchControl display is registered and all the functions of the fridge freezer – such as temperature, alarm and holiday mode – can be immediately set. Furthermore, the touchControl display is also the communications hub for iSensoric, as this is where the data is collected from the various sensors for controlling other functions. For more convenience, the freezer and fridge can be controlled separately thanks to their independent cooling circuits.

4 Inverter motor

The intelligent inverter technology is a clever combination of the inverter motor and iSensoric. The sensors register every slight change in temperature or humidity inside the refrigerator, for example when the door is opened or warm food is stored. This information is then passed to the inverter motor, which adapts its need for energy accordingly. This means you can cool food intelligently and energy-efficiently, and thanks to the high-quality inverter motor, incredibly quietly.

Beautiful on the inside.

Stylish, spacious and packed full of innovative technology Siemens cooling appliances feature steel trims to the glass shelves, metal trims to the door compartments and chrome bottle racks, making them look great on the inside too.

Ingenious and elegant storage solutions

Optimum temperature guaranteed

The multiAirflow System keeps food at the optimum temperature by circulating air around the fridge evenly to maintain the temperature on all shelves. This ensures freshness and saves energy as the system cools down new warmer food entering the fridge 40% faster than a standard fridge, because the motor doesn't need to work as hard to cool the fridge down.

Perfectly designed for convenience and practicality.

Elegant, energy efficient lighting

LED lighting is the most efficient lighting available. Now integrated seamlessly into the side walls of the fridge, they give maximum illumination and no loss of fridge space. The freezer drawer is also lit in the same way with bright, non-glare light.

Keeps food smells separate

The airFreshFilter separates smells, keeping the fridge fresh at all times and meaning that sweet and savoury food can sit side-by-side. The airFreshFilter neutralises odours, ensuring that smells don't transfer between foods, whilst the Anti-microbial filter stops the transfer of germs and bacteria.

Flexible storage

Flexibility to meet ever-changing lifestyles is guaranteed with flexiShelf. Folding back half the shelf makes room below for larger items, whilst having it down creates extra shelf space. The bigBox also has the capacity to store a whole frozen turkey, and the height to hold tall dessert glasses upright.

The perfect environment for fresh food.

Food preservation technologies that mean you can store a lettuce for up to 20 days and it will still taste as fresh as the day you buy it.

Research shows that UK households are throwing away £12 billion worth of food every year. That means the average household with children throws away about £50 worth of food and drink a month.*

There's nothing worse than stocking

your fridge full of fresh food, only to

edible. Saving you time and money

Siemens fridge freezers feature new

technology that is going to prolong

meaning there will be fewer trips to the supermarket and you can enjoy your favourite foods for longer.

the life of your fresh produce,

find that a few days later it is no longer

The vitaFresh food preservation system, makes your fresh produce last up to three times longer.

Fresh food up to three times longer

Keeping foods fresher for up to 3 times as long compared to a conventional vegetable drawer. The "dry" zone and "dewpoint" zone within vitaFresh drawers determine how much humidity food receives. Storing foods at their optimum humidity creates less food wastage, meaning fewer trips to the supermarket and cutting down on your food bills.

Preserves food up to twice as long

Fresh food can last twice as long as it does in a standard vegetable drawer in the Siemens hydroFresh drawer. With an innovative humidity control the drawer keeps minerals and nutrients in vegetables, salad and fruit for longer, increasing their use by date and meaning you'll require fewer trips to the supermarket – saving you time and money.

These benefits include; keeping your food at the correct temperature, locking in the nutrients with our innovative hydroFresh drawer, and the airFresh filter that helps to separate the smells in your fridge meaning no cross contamination between sweet and savoury foods. The coolest way to preserve your food, choose a Siemens fridge freezer.

A box in the fridge with an individual temperature control

freshProtectbox can be set to 0°C for meat and fish, 2°C for milk products and 4°C for fruit and vegetables, providing the optimum temperature for individual foods, allowing them to stay fresher for longer. Fresh ingredients are the basis for delicious meals, but also count for less wastage and fewer trips to the supermarket.

Ideal storage for meat and fish

Ideal for storing meat and fish, the coolBox creates an environment that is almost 3°C cooler than the rest of the fridge. The coolBox stores meat and fish at the optimum preservation temperature, whilst allowing other food in the fridge to be chilled at around 4°C. Food tastes better for longer and there is less food wastage.

Keeps food smells separate

Shelves separate food. The airFresh filter separates smells, ensuring that the fridge smells fresh at all times. The airFresh filter neutralises odours in the fridge, ensuring that smells don't transfer between foods, while the Anti-microbial filter stops the transfer of germs and bacteria. Sweet and savoury can sit side-by-side and you can enjoy a fresh smelling fridge every time you open the door.

Optimum temperature guaranteed

Monitoring the temperature of the room, sensors in the fridge detect how much power is needed to maintain optimum fridge and freezer temperatures. Less fluctuation in temperature ensures food is stored safely and also helps to make sure only the energy needed is used. Food preservation and energy efficiency go hand-in-hand with vitaControl.

Minimum energy consumption 24/7, 365 days a year.

We are committed to developing energy saving technology that makes a difference.

Packed with ingenious and energy efficient solutions, a Siemens appliance is perfectly designed for your convenience and practicality. And there is so much more that you won't even see, including the environmental benefits. Perhaps the most important energy efficiency technology is that designed to keep your food fresher for longer. Storing foods at their optimum humidity and temperature creates less food wastage, meaning fewer trips to the supermarket, cutting food bills.

The multiAirflow System helps to circulate air around the fridge evenly, meaning that temperatures on all shelves are maintained to keep food at its optimum temperature and fresh. This also saves energy as the multiAirflow System cools down new warmer food entering the fridge 40% faster than a standard fridge meaning the motor doesn't need to work as hard to cool the fridge down.

When you're on holiday or a long business trip Holiday Mode will ensure that your food in the freezer stays cold enough to maintain freshness. Our fridges also feature a warning alarm that alerts you when the fridge door has been left open, ensuring that energy isn't needlessly wasted and preserving the food inside, both save money and energy usage.

Designed for an easy life.

With noFrost technology you'll never have the job of defrosting the freezer again.

No ice build up on freezer walls or food packaging

Who has time to defrost the freezer? Those with a Siemens noFrost freezer do, because there simply is no need to. Using an air circulation system to remove humidity and stop frost and ice building up on the freezer walls and packaging, the freezer looks after itself. Hassle free, you won't need to turn off the freezer to defrost and you can enjoy fresher food, no more soggy packaging and a frost free freezer for life.

Because life's too short

For those models that come with lowFrost life is still made easier. lowFrost reduces the build-up of frost by up to 50%, meaning that you don't need to defrost the freezer as often, only once every 18 months to 2 years*. Designed to save you time and provide added convenience, you can spend your time on the things you enjoy, not defrosting your freezer.

*Dependent on how many times the door is opened and closed.

Models shown: Upright fridge with indoor water dispenser KS36WPI30 and Upright noFrost freezer with indoor ice dispenser GS36DPI20.

Fresh water

and ice on tap.

At the touch of a button dispensing refreshing ice-cool water and ice. Siemens puts you in control of your fridge freezer.

Plumbed in water and ice dispensers give you access to fresh water and ice both day and night.

Fresh water and ice both day and night

Providing you with chilled, filtered water and crushed or cubed ice at the touch of a button, the water and ice dispenser built into iQ700 Siemens fridge and freezer is a convenient time saver. Serving you with a refreshing drink whenever you want, the ice dispenser can produce up to 140 ice cubes per day. With LED down lighting on our premium model, the coolDuo ice and water dispenser is not only luxuriously convenient; it is also classically designed.

Precise temperature control at your fingertips

With easy to use electronic controls Siemens fridge freezers never leave you in the dark. The electronic display allows you to precisely set and change the temperature of your fridge and freezer and select certain modes, such as Holiday Mode, putting the power of your new fridge freezer at the end of your finger tips.

Stunning on the outside, beautiful on the inside

With a streamline design on the outside, Siemens fridge freezers are just as elegant inside. Superbly designed with; conveniently placed LED lighting, easyLift door shelves, a flexiShelf that folds down if you need additional shelf storage or neatly folds away if you don't and a bigBox in the freezer that is perfect for stacking several pizzas or those pre-filled dessert glasses you need chilling for your dinner party; there's a place for everything.

Fresh water and ice on tap.

Plumbed-in water and ice dispensers give you access to fresh water and ice both day and night.

Full of seriously innovative technology Siemens premium iQ700 upright fridge and freezer feature an in-door ice and water dispenser, the iQ500 upright fridges in the range all boast vitaControl and hydroFresh food preservation systems and flexible storage with flexiShelf. Whilst the ever stylish upright freezers across the range all feature noFrost technology and all have a bigBox for extra large food items.

Ice and a slice

Providing you with chilled, filtered water and crushed or cubed ice at the touch of a button, the water and ice dispenser built into iQ700 Siemens fridge and freezer is a convenient time saver.

Preserves food up to twice as long

Be in control with hydroFresh; with the innovative humidity control, food can last twice as long in the specialist drawer. Not only does this keep in nutrients and minerals that help to create a delicious meal, but as food lasts for longer you'll require fewer trips to the supermarket – saving you time, effort and money.

Never have to defrost ever again

Intelligent noFrost technology completely stops the build-up of frost and ice – for life. Not only a time saver, noFrost also ensures that the cavity space within is not compromised by frost, providing you with the same room within the freezer as the day you bought it for years to come.

Beautiful and smart.

Beautiful, clean design married with first-class quality and smart thinking.

Technology and style combined our iQ700 fridge freezers boast vitaFresh or hydroFresh food preservation systems, noFrost technology that means you'll never have to defrost the freezer again and an advanced multiAirflow system to keep your food as fresh as possible, all with a 5 year parts and labour guarantee for added peace of mind, our top of the range appliances work effortlessly for you.

vitaFresh - food preservation storage drawers.

Advanced technology making food taste as nature intended.

Fresh food up to three times longer

The "dry" zone and "dewpoint" zone within vitaFresh determine how much humidity food receives. Storing foods at their optimum humidity can help them last up to 3 times as long. This creates less food wastage, meaning fewer trips to the supermarket and cutting down on your food bills.

Keeping food tasting as nature intended

Keeping minerals and nutrients locked into your food for longer, Siemens innovative vitaFresh drawer keeps food fresher for up to 3 times as long compared to a conventional vegetable drawer and tastes just as good as the day you bought it.

Beautiful on the inside

Not only do our fridge freezers look great on the outside, they are spacious and packed full of innovative features on the inside. Steel trims to the glass shelves and door compartments, chrome bottle racks and elegant, energy efficient LED lighting, they look great on the inside too.

Ideal storage environment.

A range of storage environments, offering optimum conditions for all your food preservation needs.

Exuding class and refinement Siemens iQ500 models unite first class features with top-class technology and come with a 5-year parts and labour guarantee for added peace of mind. All feature humidity controlled food preservation systems, either hydroFresh, coolBox or crisperBox and noFrost technology. With a variety of sizes available and adaptable storage to meet your changing needs there really is something for everyone.

Optimum storage solutions for fresh food.

Stylish design combined with precise temperature control and perfect storage conditions.

Preserves food up to twice as long

Be in control with hydroFresh; with the innovative humidity control, food can last twice as long in the specialist drawer. Not only does this keep in nutrients and minerals that help to create a delicious meal, but as food lasts for longer you'll require fewer trips to the supermarket – saving you time, effort and money.

A couple of degrees makes all the difference

Food such as fish and meat benefit from temperatures close to 0°C, yet this can damage other food stored in your fridge. The coolBox stores meat and fish at the optimum preservation temperature, whilst allowing other food in the fridge to be chilled at around 4°C. It's a tailored environment for your food.

Fresh smelling interior

The airFresh filter neutralises odours in the fridge, ensuring that smells don't transfer between foods. Enjoy a fresh smelling fridge every time you open the door.

The art of cooling.

All Siemens cooling appliances are designed to look the part as well as deliver on excellent performance too.

Siemens iQ300 models are equipped with an attractive selection of smart technology and look good too. Available with features such as integrated handles which adds to the sleek stainless steel design, flexible shelving, lowFrost technology and A++ energy efficiency. Conveniently designed to fit in with your lifestyle, and kitchen.

A crisperBox with humidity control keeps food fresh.

Designed to fit in with your lifestyle.

Because life's too short

lowFrost is designed to save you time and provide added convenience. It reduces freezer build-up by up to 50%, meaning the freezer only needs defrosting once every 18 months to 2 years, depending on how many times you open and close the door.

Perfect for entertaining

Big enough for your lifestyle, the bigBox has the capacity for storing whole frozen turkeys, as well as the height to hold dessert glasses upright. Ideal for the holidays and entertaining alike.

Fresher food for longer

The crisperBox allows you to control the humidity level within the drawer to ensure that fruit and vegetables are kept in the ideal environment to stay fresher, and tastier, for longer.

Save space in your kitchen.

Siemens fridge freezers and upright fridges and freezers do not need any space at the sides for ventilation.

No side clearance required

This means that a 60cm refrigeration appliance will fit into that exact niche – no need for ventilation clearance, and the special door hinges mean the door will open within that space. So, it's easy to update your old energy guzzling 55cm model and replace it with a new, energy efficient 60cm model.

Tried and tested

All Siemens fridges and freezers are built to last. And rigorous testing ensures that our products meet all the requirements of our customers. Every single one of our appliances is tested before it leaves the factory. For 24 hours a day, components are tested continuously to the maximum tolerance possible for the equivalent lifetime of the appliance. The shelves are strong enough to take 20kg of weight and our doors are weighted and then opened and closed by the handle 200,000 times during testing to ensure they are robust (200,000 times is equivalent to opening and closing the door 27 times per day for 20 years). Materials are not only tested for suitability and longevity, we also look at how they sound and feel when we use them.

Customer service.

Knowledge and expertise, where you need it, when you need it.

Purchasing a Siemens appliance gives you access to our expert customer service team; for the lifetime of your appliance. With 2-5 year guarantees on offer and multi-award winning products to choose from and assistance from an outstanding customer service department, you can be assured that the appliance you are buying will offer peace of mind.

Siemens Customer Service has received the Highly Commended accolade in the Domestic and General Total Excellence and Quality Award 2014.

Expert advice

Siemens Customer Service staff are full of knowledge and expertise, whether you have a simple question, want to order a spare or replacement part or require an engineer to visit your home. With engineers based locally across the country*, no one is better suited to help, and all Siemens repairs are analysed in advance so that we bring the correct replacement spare parts likely to be needed on the first visit**.

This is all supported by our outstanding online services, available 24 hours a day. Visit **siemens-home.co.uk** for product information, downloadable brochures, videos, instruction manuals and FAQs.

Telephone: UK: **0344 892 8999** – Options 3 and 4 IRL: **(01) 450 2655**

Original replacement spare parts

Order replacement parts online and access exploded diagrams to help you locate the correct part. As a manufacturer we only use original spare parts we keep a comprehensive range of parts available for up to ten years.

Greener products, cleaner planet.

World-class performance. Minimum environmental impact.

Investing in the future, Siemens is committed to protecting the Earth's natural resources.

More than 80 percent* of the environmental impact occurring over a home appliance's lifetime is attributable to the usage phase. This is why, over the last few decades, BSH developers have been focusing on designing appliances that consume less energy, water and detergent. Environmental protection and energy efficiency are core topics within our corporate strategy.

What does this mean to you?

Our innovative energy-saving solutions from leading energy saving motors, to the brightest white, low-energy (LED) light can save you money and decrease your energy usage.

Energy saving comes automatically

Supporting environmental initiatives, the EU energy efficiency label is carried on all appliances; class A+++ being the most energy efficient. Reinforcing our focus on reducing energy consumption of our appliances reducing our carbon footprint, and passing on this energy saving to you, the consumer.

World-class performance

The Siemens i-Dos washing machine eliminates overdosing, cuts longer wash cycles and reduces unnecessary extra rinsing. This saves up to 7,000 litres of water and 11 litres of detergent per year, whilst cutting down the average cycle time by 14 minutes, amounts to a saving of two full days per year in the machine's running time.

All Siemens washing machines automatically adapt the wash time and energy consumption to the amount of laundry in the machine. Decreasing a washing machine's cycle time by up to 65%. speedPerfect is ideal for getting through laundry quickly, whereas ecoPerfect reduces the machines energy output by up to 50% by lengthening the time of a cycle. All of our core range of models carry the most efficient A+++ energy rating.

All Siemens fridge-freezers have a minimum A+ rating for energy efficiency. If all UK consumers who brought an A rated fridge freezer in 2011 had purchased an A+++ rated appliance instead, UK households would have saved £24 million and 100,000 tonnes of carbon in one year. All freestanding A++ and A+++ cooling appliance's are now supplied with a green power cable and the freezers come with two green ice packs to help identify them as being super efficient.

Much is the same for dishwashers with all of the Siemens range rated at least A+ for energy efficiency. Siemens dishwashers with Zeolith[®] set the standard for A+++ energy efficiency, Zeolith[®] science combined with our smart energy-saving hydroDry technology, help to make our innovative dishwashers super efficient.

In buying a Siemens product you can expect outstanding world-class performance, as well as a clear conscience.
