

Designed to work beautifully

STOVES & FIRES

Pellet | Wood | Multi Fuel | Electric

2023 / 2024

Waterford  Stanley

ALL OUR STOVES ARE 100% ECODESIGN

WHAT DOES ECODESIGN* MEAN?

EFFICIENCY

- All our stoves have an efficiency rating over 75%
- Some solid fuel/wood stoves as high as 82%
- Stanley SOLIS Pellet Stoves 95%+ efficient
- 3 times more efficient than an open fire
- More efficient and cleaner than older stoves

SUSTAINABILITY

- Reduction of:
 - CO (Carbon Monoxide)
 - Organic Gaseous Compounds (OGC)
 - Nitrogen Oxides (NOx)
- More stringent testing
- Reduction of emissions into the atmosphere
- Cleaner than open fires and older stoves

SAFETY

- Reduction of particulate matter into the atmosphere
- Improving air quality
- Making them safer to burn

Based on the emission reductions and new requirements, Ecodesign will significantly improve air quality and help the environment. From January 2022 on consumers can only buy Ecodesign stoves.

Waterford Stanley Innovation

An Irish company with a long and proud tradition, Waterford Stanley has been bringing warmth and comfort to homes for generations, stretching back to when the first range cooker was designed and built in Waterford, Ireland in 1936.

Our brands include Stanley, AGA, Rangemaster, Rayburn, Falcon, Mercury, La Cornue, Novy, Kamado Joe, Masterbuilt, Bilberry and Waterford Appliances. These combine superb craftsmanship and design to create products that suit a modern lifestyle and bring people together over good food, warmth and a strong sense of heritage.

Our product portfolio includes electric, wood, multifuel and pellet stoves, Air to Water Heat Pumps and Underfloor Heating, as well as built-in appliances including hobs, ovens, dishwashers, microwaves and refrigeration. We also offer a comprehensive and stunning range of cookers from Stanley, Rangemaster, AGA, Rayburn, Falcon, Mercury and La Cornue.

Feel the warmth

SOLIS K50 Pellet

“ I love the convenience of it. Literally 3 minutes in the morning, fill up the hopper, Hoover out any ash if required and press the button to go.

No using firelighters or kindling. Pellets are a much cleaner fuel to use.

”

SOLIS F650 Style

“ You know you are getting a good product with a Stanley. It was the right size, we didn't want anything too big and we just loved the look of it. All my family have Stanley's in their home – my daughter Lucy loves to crawl around it!

”

Cara Glass

“ It's homely, it's cosy and it's inviting. I find the Cara Glass therapeutic to sit and look at the fire. The room where it went in to is north facing and was typically a cold room. When the Cara Glass is lighting, the heat builds up in the room so we often open the door and let the heat out into the hall and up the stairs

”

SOLIS I900

“ The heat and the flame picture is a winner. Looks even more impressive than an open fire. Love the subtle handle. The kids don't know where it is and don't reach for it so that's a plus. Even when friends come over the first question is 'How do you open it?'

”

SOLIS F900 Ridge

“ We saw the Stanley SOLIS F900 Ridge stove in the shop and knew immediately it was the one we wanted because of the large viewing glass and that it was modern and sleek. My sisters have Stanley stoves and it's a reliable local brand.

”

SOLIS K50 Pellet Stove

“ We had a solid fuel stove before and we wanted to get away from burning coal and logs and do our bit to help the environment. Pellets are also a lot cheaper than buying coal.

”

Reginald Eco

Inspired by the famous Reginald's Tower in Waterford that has protected the city for almost 1,000 years, the Reginald is designed and developed in Waterford to the highest standards of enduring craftsmanship. Behind the sculpted curves, chrome detailing and elegant styling lies a next generation stove designed for a new era in home heating efficiency.

Cara Eco Insert

The Cara Eco Insert Stove is the ideal home heating solution for those who want the warmth and efficiency of a cast iron stove with all the visual benefits of an open fire. The Cara Eco Insert aims to retain the appearance of an open fire while bringing all the benefits of a stove and is 3 times more efficient than an open fire. It is the perfect solution for where space is at a premium.

FEATURES

- › Model: Insert Room Heating
- › Fits into a standard fireplace
- › Easily connected to a standard 125mm diameter chimney
- › Large viewing glass
- › Secondary air provides cleaner combustion
- › Window wash air to maintain a clean glass
- › Raised grate for optimum fuel burn
- › Large Ashpan
- › High quality, cast iron build
- › Modern, yet classic design

DIMENSIONS

BENEFITS

- › Tested & approved to European standard - EN 13229
- › 5 year warranty
- › Fits into most standard fireplaces
- › Ecodesign 2022 approved

OPTIONAL EXTRAS

- › External air supply kit - Directs air from the outside into the stove to aid efficient combustion.
- › Cast iron filler piece available in matt black to fit most curved fireplaces

The minimum clearance to combustibles required is 550mm to the top, 350mm to the sides, 550mm directly to the front and 350mm to any combustible flooring. If the mantelpiece protrudes further than 100mm from the fireplace, then it will be necessary to have further clearance to the top of the stove. The distance the mantle protrudes past the 100mm should be added to the clearance. For example, if the mantle protrudes 200mm, the clearance to the mantle should be 650mm.

Cara Glass Eco Insert

Our contemporary Cara Glass Eco Insert is the ideal solution for those who want warmth, efficiency and contemporary good looks. The Cara Glass Eco Insert is three times more efficient than an open fire and takes up minimal hearth space meaning less intrusion in your room. The Cara Glass Eco Insert comes in 3 and 4 frame meaning it can fit into standard fireplace or can be placed on a wall.

FEATURES

Model: Insert Room Heating

Fits into a standard fireplace

Top flue outlet only

Available in 3 and 4 sided frame

Easily connected to a standard 125mm diameter chimney

Large viewing glass

- › Secondary air provides cleaner combustion
- › Window wash air to maintain a clean glass

Every home should have a Stanley or a Bilberry

As Ireland's leading heating company we understand that when you bring home a Waterford Stanley product you are choosing a product you can rely on, from a name you can trust. Based in Waterford since 1936 the ideals and dedication to perfection remain unchanged today ensuring that every appliance that bears the Stanley name is of the highest quality.

RANGE OF MODELS

Range of Styles - Insert, Cassette, Built in, Wall Hung or Freestanding, there's a model to suit everyone's needs.

Energy outputs - Whether it's simply an electric fire to provide ambience in your home or the Reginald stove which will heat up to 14 radiators, we have a Stanley to suit you.

Choice of Fuels - Stanley have a comprehensive range of products in various fuels types: electric fires and inserts, gas fires and stoves, wood and multifuel stoves, oil, multifuel, all electric and dual fuel cookers. We have a Stanley for your home.

HERITAGE

Over 500,000 homes throughout Ireland have one of our products, supported by a comprehensive network of stockists. Across the country we have dedicated centres of excellence for Stanley, Rangemaster and AGA, with the largest range of our displayed including working models and trained staff with an in-depth knowledge of our product range.

In addition we have an extensive network of service engineers across the Island of Ireland for Stanley and Rayburn and Republic of Ireland for AGA and Rangemaster.

For tips and inspiration across our brands, follow us @waterfordstanley

TALK TO SOMEONE WHO OWNS ONE

Follow your heart to Stanley, and if you need convincing, talk to somebody who already has one. They'll tell you how much you save, and how much more you gain. Why not check our Stanley Stories online or in this brochure from people who have a Stanley in their home?

A NAME TO TRUST

As Ireland's leading heating company, every single product that bears the Stanley name is designed to the highest standards and built to last. Throughout Ireland, home heating experts are available in your local Stanley retailers to offer advice and guide you in choosing the best Stanley appliance to suit your needs. Our Customer Service team in Waterford are always on hand to provide expert advice on spare parts availability and after sales support on your Stanley.

ECODESIGN 2022

Ecodesign is the European-wide programme to lower emissions to improve air quality from a range of appliances that use energy including stoves and will come into force 1st January 2022. It will apply to both wood burning and solid fuel stoves.

Waterford Stanley is committed to certifying its stoves for Ecodesign 2022. Where you see the Ecodesign logo on our SOLIS and Classic range, they have already been certified for Ecodesign 2022.

CERTIFICATION AND TESTING

Before a product receives the Stanley seal of approval, our research and development team carry out exhaustive safety, quality and performance testing, measuring heat economy, CO emissions and build durability. Every stove is then independently tested and approved to the relevant European Standard.

Part of

Middleby Residential

Middleby Residential is a collection of premier international consumer brands dedicated to manufacturing and distributing many of the best known and loved kitchen appliances and interior furnishings in the world. Stanley, AGA, Rangemaster, Rayburn, Falcon, Mercury, La Cornue and Kamado Joe are just some of the brands under the Middleby Residential division.

For more than 100 years the company has been innovating and leading the way in foodservice and you'll find Middleby brands in many of the world's most famous kitchens.

Waterford Stanley is part of the Middleby Corporation, the leading global provider of commercial kitchen equipment.

Waterford Stanley
Residential

Waterford Stanley
Renewables

Our renewable Stanley heating product range comprises air-to-water heat pumps together with bespoke underfloor heating solutions

We provide an extensive design and support service. Heat loss calculations, heat pump certification, underfloor heating design and designer sign-off certification are all part of our service to ensure that our product meets the building regulations requirements.

In addition, we offer room heating and central heating stoves in pellet, wood and multifuel options all of which are compliant with Ecodesign 2022, the new European standard for lowering emissions from wood burning and multi-fuel stoves.
