- Highly realistic log effect fuel bed with glowing embers
- Programmable Thermostatic Remote
- Integral Convected Fan Air System
- Balanced Flue - Natural Gas and LPG
- British Designed, Engineered and Manufactured

Innovation & Inspiration...

Fabulous Flames and Frames

The very latest fire to adorn the Gazco range, the Eclipse 100 brings with it a series of new technological advancements that combine to create a high efficiency fire with a truly awe-inspiring flame picture. The generous firebox offers a highly realistic flame picture that flows through a hand-painted, ultra realistic log-effect fuel bed accentuated by a mesmerising glowing ember bed. The Eclipse also presents a choice of three sophisticated frames and a 'hole-in-the-wall' frameless Edge design which ensures there is a modern, contemporary style choice to suit all interiors.

Convenient Control

The Eclipse 100 also comes complete with a Programmable Thermostatic remote control as standard. Allowing you full control over your fire, the handset operates everything from ignition to extinguish as well as integrating a programmable timer, temperature control and Gazco's convection fan air system from the touch of a button. The advanced dual-burner system also allows you to set your perfect atmosphere by selecting to use one or two burners, giving you total control over flame height and heat output.

Luxury Linings

Further extending its appeal and style options, the Eclipse 100 has two attractive lining choices - classic Black Reeded and smart Ledgestone Effect. The Black Reeded lining offers a striking contrast to the flickering flame, whilst the Ledgestone Effect, with its textured profile finish, brings a brighter, natural alternative that adds interest even when the fire is off. Each lining enhances the overall setting of your new Eclipse fire whilst offering their own unique and distinctive finish.

Relax... it's Gazco!

Expert Retailer Network

We take great care to ensure that our fires are designed, tested and manufactured to the highest possible quality and safety standards. We are just as concerned to make certain that they are sold and installed correctly so that you enjoy years of pleasure from your fire.

Accordingly, you will find our products are only available from experienced, independent retailers who will be happy to show you a selection of models locally in their showrooms, often fully operational. These independent retailers will discuss your individual requirements both technical (such as sizing the heat output to your room and advising on your flue type) and design, and ensure that you select the most appropriate product for your home.

They will also be able to advise on, or assist with, the installation process as well as help provide any after-sales support and servicing your appliance may require in the future.

Whilst we encourage our retailers to promote fireplace products and their outlets via the internet, we do not believe suitable levels of customer care and satisfaction can be obtained from purchasing the product only online and we would strongly recommend that you consider this when undertaking your research and making a purchasing decision. Furthermore, please be aware that we do not offer technical support (beyond our statutory responsibilities) to products bought via nationwide online sales, where this support would normally be offered by one of our qualified, independent retailers.

Expert Retailer - Five Year Extended Warranty

Furthermore your Gazco Expert Retailer will provide you with a Five Year Extended Warranty for your new gas fire, provided your fire is registered with Gazco. Please note, this warranty excludes certain consumable parts. Fires purchased outside of Gazco's Expert Retailer Network will carry a standard 1 Year Warranty. Full warranty terms and conditions are available to view at www.gazco.com. The Eclipse 100 is also CE marked meaning it has been independently tested to exacting European standards for safety as well as heating efficiency and emissions.

Eclipse Edge

Eclipse 100 Edge with Ledge Stone Effect Lining

Installed as a frameless 'Edge', the Eclipse 100 can create a breathtaking hole-in-the-wall focal point that lets the enticing flame picture take centre stage - perfect for any interior. With the tall, eager flames dancing through the wonderfully realistic log-effect fuel bed, the Eclipse 100 Edge is a statement in itself.

Dimensions upon installation (w x h):
1067 x 451mm

Eclipse Expression

Eclipse 100 Expression in Graphite with Black Reeded Lining. Installed with a Tiled Wall Fitting Kit.

The Eclipse Expression is a versatile frame that can fit in with a wide spectrum of interior styles. Available in Graphite or a choice of three stunning metallic colour options, the deep profile of the Expression frame has a smooth, geometric design which perfectly captures the large flame picture and naturalistic log-effect fuel bed. A perfect finish to an already incredible focal point.

Frame Dimensions (w x h x d): 1290 x 650 x 40mm

Frame Finishes:

Eclipse 100 Expression in Graphite with Ledgestone Effect Lining

Eclipse Verve XS

Eclipse 100 Verve XS in Metallic Red with Black Reeded Lining

For a slightly bolder style choice, the Eclipse Verve XS has a subtly curving 3D form which can be appreciated from all angles. Available in sophisticated Graphite or a choice of striking supplementary colours, the Verve XS really adds impact and accentuates the impressive Eclipse in your living room.

Frame Dimensions (w x h x d): 1435 x 693 x 58mm

Installation and Safety

Gazco gas fires must be fitted and annually serviced by a qualified gas installer (GasSafe registered in the United Kingdom or Bord Gáis registered in the Republic of Ireland) who should also verify the proposed site conditions are fully suitable for the product selected. To aid the essential flow of non-combustion air around the appliance, the cavity of the chimney breast must be vented to the room. Full details of this along with complete installation instructions are available view or download from www.gazco.com

Please note that all parts of these fires, particularly the glass panel on certain models, become extremely hot during operation and can result in serious injury and burns if touched. It is therefore recommended that a fireguard complying with BS 8423:2002 is used in the presence of young children, the elderly or infirm.

Colours/Flame Pictures & Product Improvement

Owing to variations in studio lighting and printing inks, the finishes/colours of fires illustrated in this brochure may differ slightly from actual models. Before purchasing, please ask your retailer to show you finish/colour samples. Whilst all the flame pictures shown in this brochure are actual fires, flame pictures may vary depending on the installation, flue conditions and geographical/surrounding features that may effect the efficiency of the flue.

Gazco pursue a policy of continuous product improvement, therefore, whilst our products are correct at the time of the photography, we reserve the right to make alterations and amendments. Exact product details should be discussed with your retailer at the time of purchase.

Renovation Kit

This innovative addition allows your balanced flue Eclipse 100 fire to be installed in an existing fireplace opening by passing two liners down a conventional masonry system. Your retailer will be able to advise on your specific requirements.
