The Woodford Collection is a premium range of Eco-Design Ready stoves, approved by the SiA and rated by the government's Clear Skies Scheme.

Our stoves are designed to fit the classic British fireplace and come in a range of sizes and designs that not only look great, but work in any room. All our stoves come with the latest Clean Burn technology and loads of other features as standard. They can be ordered online: www.flue-ducting.co.uk, in-store, or, with your local retailer.

Our collection of solid limestone fireplaces are some of Portugal's finest exports. Handcrafted Portuguese limestone, with matching hearths and chambers in limestone and honed slate. The selection will truly be a centrepiece of elegance and focus for any home.

We can also produce bespoke fireplaces, so please feel free to talk to your retailer about your own design.

TOTAL CHIMNEY SOLUTIONS

The Woodford Collection is a hand picked luxurious range of multi-fuel Stoves designed for modern living but keeping the traditional values of every British home at heart.

The Lowry Stoves

Standard features:

- SiA Ecodesign Ready
- Defra approved
- Clean Burn and Clean Glass system
- Cast iron door
- Multi-fuel
- Side riddling grate
- Primary and secondary air controls
- Direct Air as standard
- Lifetime warranty on the body of the stove
- Removable baffle

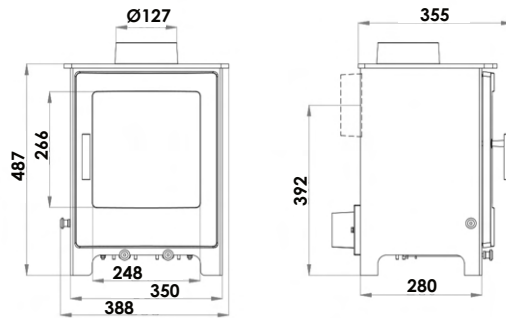

The Lowry consists of three stoves that all have a 5kw heat output and are multi-fuel; Lowry 5, Lowry 5X and the Lowry 5XL Widescreen. All the Lowry stoves are perfectly sized for every home. With all modern features as standard, this new addition to our collection truly has it all. Our Lowry stoves have a thick gauge steel body and a smooth crafted cast iron door, that give them a modern and smooth appearance. Complete with large viewing glass that will stay ultra clean due to their high efficiency and clean burn technology the Lowry stoves will look stunning in any home. Multi-fuel as standard, with a built-in riddling grate and ash pan, the Lowry stoves tick all the boxes.

The Woodford stoves have a simple, easy-to-use air control system. Two levers located under the door allow you to control the airflow into the stove, giving you amazing controllability.

The full product specification and details of all our products can be found at www.flue-ducting.co.uk.

The Chadwick Stove

Standard features:

- SiA Ecodesign Ready
- Clean Burn and Clean Glass System
- Cast iron curved door
- Multi-fuel and wood-burning stove
- Primary, secondary and tertiary controls
- Direct Air as standard
- Large viewing glass
- Lifetime warranty on the body

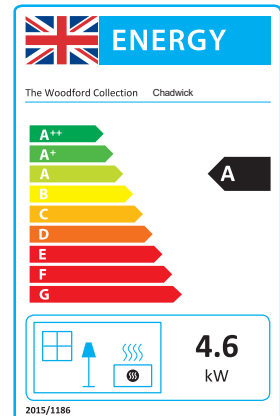

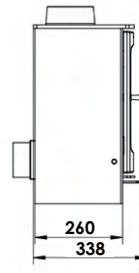

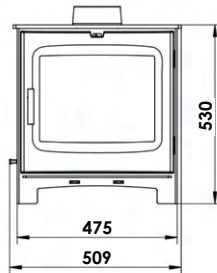

Our Chadwick multi-fuel stove is the newest addition to our Woodford family. An ideal size for every home, with a heat output of 4.6kw. Beautifully designed, with a large viewing glass, where you can see the roaring flames of the fire. There are three controls on the Chadwick; Primary and secondary air controls, which are used to control the fuel burn and the airwash.

There's also, the tertiary control, which is located above the window, which controls the air supply to burn off gasses. The Chadwick has a classic, elegant and timeless design will be an optimal focal point of any home.

The full product specification and details of all our products can be found at www.flue-ducting.co.uk.

The Chadwick

What is Ecodesign?

On 1st January 2022, the European Union implemented a new regulation called Eco-Design, which means that all new stoves need to meet the agreed emissions standards, this also coincides with the Clean Air Strategy. Eco-Design stove produces on average 90% less emissions than an open fire, and approximately 80% less emissions than a stove that's 10 years old.

Woodsure & Ready To Burn Fuels

We recommend you use Woodsure & Ready To Burn certified fuel for all our stoves. Woodsure is the UK's only woodfuel quality assurance scheme.

Why Woodsure & Ready To Burn?

Woodsure & Ready To Burn are the accreditation given to woodfuel in the industry. It's fuel that's been backed by DEFRA to support The Air Quality Regulations 2022 with the goal of reducing emissions. It's fuel that's been treated in order to meet these standards.

If you've got a wood burner or stove, you need to make sure that you're buying fuel that carries the '**Ready to Burn**' mark. The **Ready to Burn** mark means that the wood has a moisture content of no more than 20%.

The **Ready to Burn** mark is run by Woodsure Ltd, a not-for-profit, DEFRA appointed Certification Body. It's the job of Woodsure to administer the **Ready to Burn** mark and to ensure that all wood sold after the 1st May 2021 complies with the *Air Quality (Domestic Solid Fuels Standard) (England) Regulations 2020*.

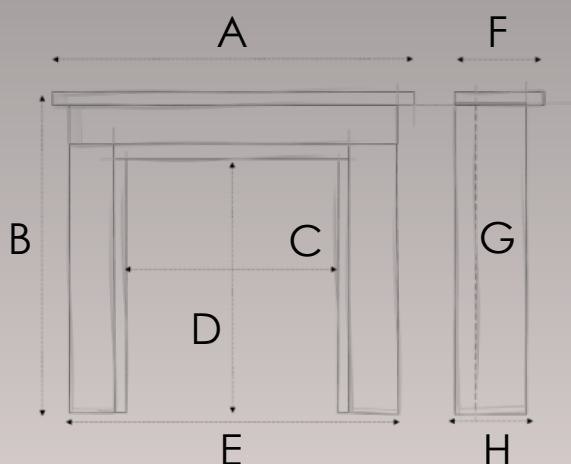

The Sutton is simply brilliant, combining modern clean edges with a small traditional shelf makes the fireplace suitable for any living area. Neat, tidy, and practically everything you need from a fireplace, the Sutton offers it all. Made from solid natural Portuguese Limestone the Sutton is crafted to perfection. Chambers

Grey limestone – Our unique grey limestone chambers are absolutely stunning and come in a block effect. They are sized to fit nearly every standard fireplace opening but can be cut down easily if required. They come in 4 easy-to-manage panels, 2x side panels at 410mm x 900mm, and a 2-piece back panel measuring 470mm x 900mm. They are solid grey Portuguese limestone panels with a block effect pattern.

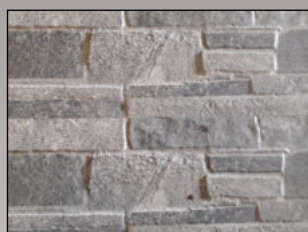

Brushed limestone – Fantastic looking brushed natural limestone chambers with a block effect. They are sized to fit nearly every standard fireplace opening but can be cut down easily if required. They come in 4 easy-to-manage panels, 2x side panels at 410mm x 900mm, and a 2-piece back panel measuring 470mm x 900mm. They are solid Portuguese limestone panels with a block effect pattern.

Slate Chambers – Our Quartz, Brown and Riven slate chambers are hand-built slate chambers mounted onto a ceramic tile, this gives for an impressive effect and enlightens any fireplace. They come in 4 pieces of 2x side panels 410mm x 900mm and a 2-piece back panel measuring 450mm x 900mm.

Vermiculite board – Another option is to board the inside of the fireplace with a plain vermiculite board, it's a Skamol board and is heat resistant. The boards are sold individually and measure 997mm x 610mm and come either 25mm or 30mm in depth.
